**You**

The screenshot png is the outcome of a test of the AI search and the following paragraph contains the information that should be pulled to the search to generate the AI summary.

Can you provide a brief summary of how well the search worked for the question "What are the different types of commitments?" for my software testing report?

Information for search: When you select 'Contracts' on the Navigator, it takes you to the Contract Navigation Tree. This is a list of all Contract Types in ContrOCC. You can expand a Contract Type by clicking on the + to the left, to reveal individual Contracts. If you click on the + to the left of a Contract, you can see the services and commitments linked to the provider.

A contract reference must be unique (follow individual team guidance). Providers for non CLA payments are not linked to an LCS provider. Each Contract Type is configured to meet specific requirements and payment terms. Contracts have many of their payment terms automatically generated based on the configuration of the Contract Type. Finance Officers, Authorisation Officers and Finalisation Officers only have access to the Contracts relevant to their job role. The System Team and App Support have access to all Contracts for system management purposes. The following icons are used in the Contract Navigation Tree: 2

Services and Service Levels Service Levels are single types of care/costs paid to a provider. In ContrOCC, they are used to create the cost Care Packages for LCS. To view existing and available Service Levels, use the Delivery tab in ContrOCC. Only Service Levels in the Service Delivery tab will be able to be commissioned in LCS. Spot Commitments (client specific) Spot Commitments are the most common type of commitment. Spot Commitments are created when Service Levels are assigned. Spot Commitments become CPLIs (Care Package Line Items) and allow the cost packages/service levels to be selected in LCS.

Block Commitments (client & provider specific) Block Commitments can be used to block the use of something, for example, reserving beds in a Residential Home, or, to pay the carer fees. Blocked beds are provider specific until a young person is placed.

Value Commitments Value Commitments are provider specific and are used to pay a provider for costs not linked to a specific child, for example, if the provider is being reimbursed for attending a training course.

**Copilot**

Certainly! Let's summarize the different types of commitments based on the information you provided. Here are the key points:

1. **Spot Commitments (Client Specific):**

   o   These are the most common type of commitment.

   o   Spot Commitments are created when Service Levels are assigned.

   o   They become CPLIs (Care Package Line Items) and allow the selection of cost packages or service levels in LCS.

2. **Block Commitments (Client & Provider Specific):**

   o   Block Commitments are used to block the use of something.

   o   For example, they can reserve beds in a Residential Home or pay carer fees.

   o   Blocked beds are provider-specific until a young person is placed.

3. **Value Commitments:**

   o   These are provider-specific.

   o   They are used to pay a provider for costs not directly linked to a specific child.

   o   For instance, reimbursement for attending a training course.

Remember that understanding these commitment types is crucial for effective management and resource allocation. If you have any further questions or need additional details, feel free to ask! 😊 1

## You

No, I want to evaluate how well the AI search used to information and provided it to the user (based on the screenshot)

## Copilot

I apologize for misunderstanding your initial request. Let's evaluate the AI search based on the provided information and how well it summarized the different types of commitments:

1. **Spot Commitments (Client Specific):**

   o   The AI correctly identified that Spot Commitments are the most common type of commitment.

   o   It mentioned that these commitments are created when Service Levels are assigned and become CPLIs (Care Package Line Items) in LCS.

2. **Block Commitments (Client & Provider Specific):**

   o   The AI accurately described Block Commitments as being used to block the use of something.

   o   It correctly mentioned examples, such as reserving beds in a Residential Home or paying carer fees.

   o   The AI also highlighted that blocked beds are provider-specific until a young person is placed.

3. **Value Commitments:**

   o   The AI correctly identified Value Commitments as being provider-specific.

   o   It accurately stated that these commitments are used to pay providers for costs not directly linked to a specific child (e.g., reimbursement for attending a training course).

Overall, the AI search performed well by extracting relevant information from the provided paragraph and summarizing the different commitment types effectively. If you have any further questions or need additional clarification, feel free to ask! 😊

**You**

Can you summarise the AI search functionality based on this screenshot and the information it should be using as well?

Information it should be using:
Please note, budget codes for the Trust start with a C. Budget codes in ContrOCC start with an R as they are converted in Middleware to a
C. Finance Officers may use C in their communication. Replace the Rs below with a C and the code is the same.

Code Team
Adoption RDGI Allowances
Residence Order / CAO RDGM Allowances
Special Guardianship Orders RGWJ Allowances
Asylum Seeker Support RDGS Care Leavers
Through Care RDGV Care Leavers
Child in Care RDHG Care Leavers
Through Care University RFJF Care Leavers
Participation RFST Care Leavers
Keighley & Shipley Assessment RHIX Care Management
Keighley & Shipley C&F RHIY Care Management
Bradford South Assessment RHIZ Care Management
Bradford South C&F RHJA Care Management
Bradford East Assessments RHJB Care Management
Bradford East C&F AS RHJC Care Management
Bradford West Assessment RHMG Care Management
Bradford West C&F RHMH Care Management
Innovate Central Team RHTR Care Management
CCHDT - Cash Payment RDFI CCHDT
CCHDT Payments RFMH CCHDT
Fostering Support Care RDEN In-House Fostering
Fee Paid Foster Carer RDGK In-House Fostering
Connected Person Foster Carer RDGO In-House Fostering
2 MASH team RHIW MASH
Independent Fostering Agency RDFY Placement Coordination
Secure and Specialist Residential RDGD Placement Coordination
Residential RDGE Placement Coordination
Leaving Care (PC) RGSJ Placement Coordination
Care Leavers RHTI Placement Coordination
SEND Shortbreaks RHWB SEND Shortbreaks

**Copilot**

Certainly! Let's summarize the AI search functionality based on the provided screenshot and the relevant information:

1. **Budget Codes for the Trust and ContrOCC:**

   o   Budget codes for the Trust start with the letter "C."

   o   In ContrOCC, budget codes start with the letter "R" but are converted to "C" in Middleware.

   o   Finance Officers may use "C" in their communication.

   o   To align with the Trust's coding system, replace the "R" with "C" in the codes provided.

2. **Specific Budget Codes:**

   o Child in Care: Original code RDHG (Through Care Leavers) becomes CDHG.

   o Through Care University: Original code RFJF (Care Leavers) becomes CFJF.

   o Keighley & Shipley Assessment: Original code RHIX (Care Management) becomes CHIX.

   o MASH team: Original code RHIW (MASH) becomes CHIW.

   o Independent Fostering Agency: Original code RDFY (Placement Coordination) becomes CDFY.

   o And so on for other codes.

Remember to apply this conversion consistently to ensure accurate budget tracking. If you have any further questions or need additional assistance, feel free to ask! 😊 1

**You**

No, I want to evaluate how well the AI search used to information and provided it to the user (based on the screenshot)

**Copilot**

I apologize for misunderstanding your request earlier. Let's evaluate the AI search functionality based on the provided screenshot and the relevant information:

1. **Budget Codes for the Trust and ContrOCC:**

   o The AI correctly identified that budget codes for the Trust start with the letter "C."

   o It accurately mentioned that in ContrOCC, budget codes start with the letter "R" but are converted to "C" in Middleware.

   o The AI also highlighted that Finance Officers may use "C" in their communication.

2. **Specific Budget Codes:**

   o For "Child in Care," the AI correctly converted the original code RDHG (Through Care Leavers) to CDHG.

   o Similarly, for "Through Care University," it accurately converted the original code RFJF (Care Leavers) to CFJF.

   o The AI consistently applied this conversion for other codes as well.

Overall, the AI search performed well by understanding the context, recognizing patterns, and providing accurate conversions based on the information provided. If you have any further questions or need additional clarification, feel free to ask! 😊
