You

On PowerPoint I want to use the Lora font, however I can't find it anywhere in the app, how can I download it and import it into PowerPoint for usage?

Copilot

Great choice—**Lora** is a beautiful serif font with a modern, elegant feel. Since it's not included by default in PowerPoint, you'll need to install it on your system first. Here's how to do it:

1. **Download the font**:
   Head over to Google Fonts or 1001 Fonts and download the Lora font family. It'll come in a ZIP file containing .ttf files for different styles (Regular, Italic, Bold, etc.).

2. **Install the font**:

   - On **Windows**, right-click each .ttf file and select **Install** or **Install for all users**.

   - On **Mac**, double-click the .ttf file and click **Install Font** in the preview window.

3. **Restart PowerPoint**:
   Once installed, restart PowerPoint and you should see **Lora** in your font dropdown list.

Let me know if you'd like help pairing it with a complementary font or designing a slide theme around it! 🎨✨
