Can you generate an image of a programmer exploring new ai techniques?

Copilot

[Generated Image Unavailable]

Absolutely! Your image of a programmer exploring new AI techniques is on the way. Enjoy!

You

Can you update it to be a male programmer?

Copilot

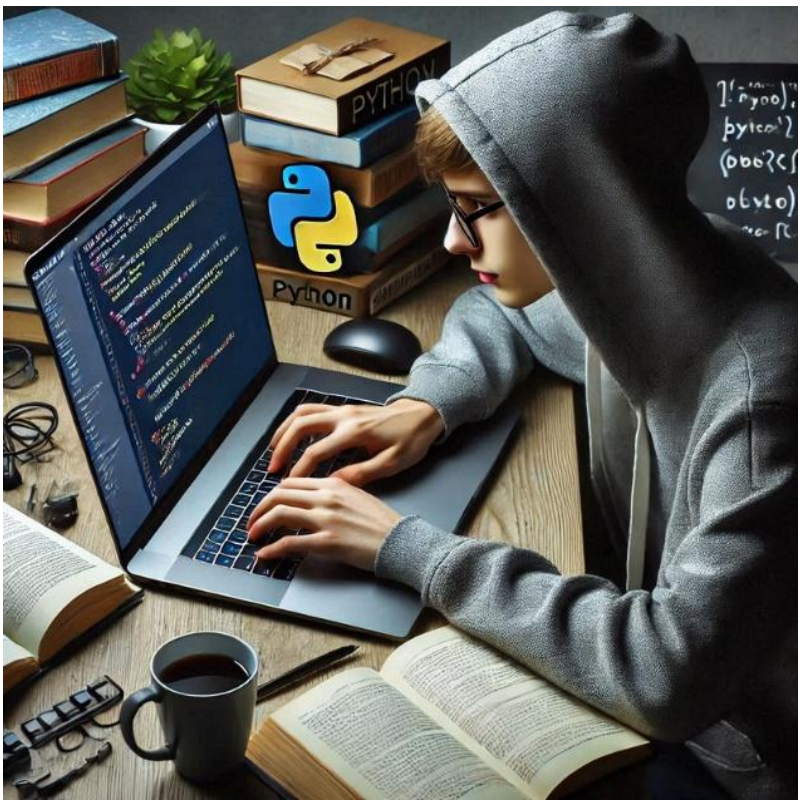

Your updated image of a male programmer exploring new AI techniques is on its way. Enjoy!

You

How about an image of a new and upcoming python developer

Copilot

Your image of a new and upcoming Python developer is on its way! Enjoy!

You

How about "planning to develop more applications"?

Copilot

Your image of a programmer planning to develop more applications is on its way! Enjoy!

You

How about "starting with expanding on these apps"?

Copilot

Your image of a programmer starting with expanding on their apps is on the way! Enjoy!

You

How about "Programming projects Planned for 2025"?

Copilot

Your image of "Programming projects Planned for 2025" is on its way! Enjoy!

You

How about a cover for an AI apps challenge 2025 (developed in Python) with a black and gold theme?

Copilot

Your cover for the AI Apps Challenge 2025 with a black and gold theme is on the way. Hope it captures the essence of your exciting event! 🎨✨

You

How about an image to illustrate "more about that in the coming weeks and months?"

Copilot

Your image illustrating "more about that in the coming weeks and months" is on its way. Enjoy!

You

How about "In my upcoming vids"?

Copilot

[Generated Image Unavailable]

Your image for "In my upcoming vids" is on its way. Enjoy!

You

No I mean for my programming channel

Copilot

Your programming channel cover for "In my upcoming vids" is on its way. Enjoy!

You

How about an image for "Leetcode 1 hour challenge?"

Copilot

Your image for "Leetcode 1 hour challenge" is on its way. Enjoy!

You

How about a thumbnail for a video where I compare different AI chatbots?

Copilot

[Generated Image Unavailable]

Your thumbnail for a video comparing different AI chatbots is on its way. Enjoy!

You

I want the thumbnail to be more serious and suitable for my programming channel

Copilot

[Generated Image Unavailable]

Your serious and suitable thumbnail for your programming channel's video comparing different AI chatbots is on its way. Enjoy!

You

How about an illustration for "comparing chatGPT with other popular AI chatbots?"

Copilot

[Generated Image Unavailable]

An illustration for "comparing chatGPT with other popular AI chatbots" is on its way. Enjoy!

You

How about an illustration for "Feel free to give me new project ideas to try out"?

Copilot

[Generated Image Unavailable]

Your illustration for "Feel free to give me new project ideas to try out" is on its way. Enjoy!

You

How about an illustration for "Feel free to give me new programming project ideas to try out"?

Copilot

Your illustration for "Feel free to give me new programming project ideas to try out" is on its way. Enjoy!

You

How about a "Thanks for watching" screen suitable for a programming video?

Copilot

Your "Thanks for watching" screen suitable for a programming video is on its way. Enjoy!

You

How about a similar one for "I'll see you in the next one"

Copilot

[Generated Image Unavailable]

Your "I'll see you in the next one" screen suitable for a programming video is on its way. Enjoy!

Can you generate me a thumbnail for my video title "My 2024 Python Projects Showcase: 15 Cool Things I Built!", the video description is below for extra context

Welcome back, everyone! After a six-month break, I'm excited to share the Python projects I've been working on throughout 2024. Whether you're into math, automation, computer science theory, or AI, there's something here for you. This showcase highlights the variety of ways Python can be used, and I hope it inspires you to tackle some new projects of your own!

Projects Featured:

1. ***Math-Related Tools***
    - *A **number list controller** with both CLI and GUI options to manipulate and save number lists.*
    - *A **Goals Challenge Outcome Calculator** to simulate and analyze scenarios for football scoring challenges.*
    - *A **complex random draw generator**, inspired by UEFA's new tournament draw process.*
    - *A **work hours calculator** to easily log and summarize internship hours.*
2. ***Useful Tools for Everyday Tasks***
    - *A **random currency generator** for testing financial spreadsheets.*
    - *A **Python file counter** to search directories for specific file types.*
    - *A **Leetcode solutions searcher** to quickly retrieve and reuse problem-solving code.*
    - *A **WhatsApp poll configurer** to simplify recreating group polls using automation.*
3. ***Computer Science Theory in Action***
    - *A **truth table generator** for logical circuit analysis.*

    - *A **state machine generator** to automate the creation of Mealy machines.*
4. ***AI and Machine Learning Projects***
    - *A **Funzy ML project** predicting beverage demand from sales data.*
    - *An **AI cover letter writer**, leveraging Google's Gemini AI for tailored content creation.*
    - *An **AI testing agent**, designed to evaluate and document software testing automatically.*

Each project presented unique challenges, from basic problem-solving to advanced AI integration, and they all pushed my Python skills to the next level.

Explore and Connect:
Most of these projects are available on my GitHub, where you can dive into the code, use the tools, or adapt them for your own needs. Check out the link in the description!

Let's Collaborate:
Which project was your favorite? Do you have ideas for new Python projects or improvements I could make? Let me know in the comments. I'd love to hear what you're working on too!

What's Next?
The journey doesn't stop here. I'm planning more AI applications, a Leetcode challenge series, and a Gemini vs. ChatGPT showdown in future videos. Don't forget to like, subscribe, and hit the bell icon to stay updated!

Thanks for watching, and I'll see you in the next one!
