You

Based on this job description, which of my cv skills should I include for this job on my cv, give me the 6 or 7 most relevant skills:

Software Engineer

Contract onsite in London Day rate: £550 - £675 per day inside IR35

We're currently seeking an accomplished and highly ambitious Software Engineer to work with our exceptional client, a world class brand in a secure environment to drive major business transformation, process and technical change across this complex organisation.

This contract roles will require you to conduct security clearance prior to assignment.
The Software Engineer role is conducted in an environment that is far from ordinary, therefore, we're not looking for ordinary.

Responsibilities:
** Full-stack engineer (front-end/back-end/deployment)*
** Contributing to the evolution of Digital Communications Platforms (intranet and public website)*
** Deliver and integrate software applications to form a complete service, enabling the decommissioning of legacy systems and applications, migration to Cloud infrastructure, and deploying Commercial Off-The-Shelf products*
** Plan and lead development on sets of related stories*
** Work with other disciplines to understand what needs to be built, and then develop an understanding of the whole system*
** Operate the production services you build, always seeking ways to improve system robustness, resilience and stability*

Skills required:
** Web development (JavaScript; React; Node; HTML); AWS; version control systems (e.g. Atlassian, GitLab)*
** Experience of SharePoint, Drupal and/or MATOMO would be advantageous, but not vital.*
As an organisation and as a team, Guidant Global are committed to fostering an equitable, diverse and inclusive workplace, where every employee and contractor feels valued and empowered throughout their time with us.
We actively seek to recruit talent from all backgrounds, and to draw on a rich blend of experiences, perspectives and creativity.
We believe that when people are respected and included, they are motivated to bring their best and whole selves to work, leading to innovative solutions and exceptional outcomes for all parties

My skills:
- *Technical Research - Authored business reports on AI mitigation strategies.*
- *Strategic Thinking and Problem-Solving - Demonstrated ability to solve real-world problems through Internship experience and Programming Projects, YouTube channels, etc.*
- *DevOps and Cloud Awareness - Familiar with AWS and Azure, also created multiple AI applications in Google Cloud Workspace.*
- *Teamwork and Collaboration - Worked effectively in Agile-style environments through group projects, internships, and as a Lab Demonstrator.*
- *Problem-Solving - Designed and deployed innovative solutions like AI-powered tools and custom business applications for real-world challenges.*
- *Eagerness to Learn - Continuously developed technical and professional skills through certifications, internships, and academic projects.*
- *Data Analysis & AI - Developed AI-powered tools and analysed consumer trends.*
- *SQL and Database Skills – Solid understanding of database systems.*
- *Cyber Security Awareness – Exposure to secure coding practices and systems management in technical projects and internships.*

- *Microsoft Power Platform - Created business tools using Power Apps, Power Automate and other Power Platform tools.*
- *Web Development - Proficient in HTML5, CSS, JavaScript, PHP, web API, etc.*
- *High academic achievement with a first-year average of 88%.*
- *Proficiency in programming languages, particularly Python & Java.*
- *Software Project Management – experienced in timely and quality delivery.*
- *Mathematics – advanced understanding of mathematical concepts applied in computing and data analysis.*
- *Android Studio, android app development.*

Copilot

Based on the job description and your CV, here are the six or seven most relevant skills to highlight:

1. **Web Development** – Your proficiency in HTML5, CSS, JavaScript, PHP, and web APIs aligns perfectly with the role's focus on full-stack engineering and digital communications platforms.
2. **DevOps and Cloud Awareness** – Since AWS is explicitly mentioned in the job description, your familiarity with AWS and Azure makes you a strong candidate.
3. **SQL and Database Skills** – A solid understanding of database systems will help with delivering and integrating software applications.
4. **Software Project Management** – Your experience in delivering projects on time and with quality fits well with the planning and leading development aspect of the role.
5. **Teamwork and Collaboration** – The job requires working with other disciplines to understand the system, making your experience in Agile-style environments valuable.
6. **Problem-Solving** – Your ability to design and deploy innovative solutions like AI-powered tools and custom business applications is ideal for improving system robustness and stability.
7. **Cyber Security Awareness** – Given the need for security clearance, your exposure to secure coding practices and system management could be a great advantage.

If you want to fine-tune your CV further, I can help tailor your skill descriptions to match the role even more closely. Let me know how you'd like to proceed!

You

How can I use my CV to write a cover letter for this job?

Copilot

Your CV provides a great foundation for crafting a tailored cover letter. A strong cover letter should highlight your most relevant skills, experiences, and achievements in relation to the job description. Here's how you can structure it:

1. Opening Paragraph – Introduction

Start by introducing yourself and mentioning the specific role you're applying for. You could reference your interest in software engineering and your enthusiasm for contributing to the company's mission.

Example:
"Dear Hiring Manager,"
"I am excited to apply for the Software Engineer position in London. With my background in full-stack development, cloud computing, and problem-solving, I am eager to contribute to your team and drive digital transformation. My experience developing AI-powered applications, web solutions, and cloud-based platforms aligns well with the role's requirements."

2. Second Paragraph – Skills & Experience

This is where you connect your CV to the job description. Focus on your strongest and most relevant skills—particularly **Web Development, DevOps & Cloud Awareness, SQL & Database Skills, Problem-Solving, and Teamwork**—and back them up with specific experiences.

Example:
"During my internship at Bradford Children and Families Trust (BCFT), I developed AI-powered solutions to

enhance productivity, including an AI-driven document extraction app and a Work Hours calculator using Python and Microsoft Power Apps. Additionally, as a Lab Demonstrator at the University of Bradford, I honed my ability to collaborate in Agile environments, guiding students through software challenges. My proficiency in web technologies—HTML5, CSS, JavaScript, PHP, and SQL—has allowed me to develop and deploy scalable applications, making me a strong fit for this role."

3. Third Paragraph – Why This Company?

Show that you've researched the company and why you want to work there.

Example:
"I am particularly drawn to this opportunity because of your commitment to driving digital transformation and technical change in a complex environment. Your focus on evolving digital communication platforms excites me, as I enjoy tackling challenges that require innovative problem-solving and system optimization."

4. Closing Paragraph – Call to Action

Reaffirm your enthusiasm and include a polite request for further discussion.

Example:
"I would love the opportunity to discuss how my skills and experiences align with your needs. Please find my CV attached for your review. I look forward to the possibility of contributing to your team."

"Best regards,"
Hasan Akhtar

Would you like me to refine any parts or adjust the wording further? Let me know how I can best tailor it for you!

You

(Now Monday, May 5)
Based on this job, what CV skills should I include:

AI Developer is needed in Leeds, United Kingdom.

Client: Machine Learning Jobs

Location: Leeds, United Kingdom

Contract: Contractor
Job Description

Shape the future of AI! As an AI Tutor- Coding,
you'll play a critical role in shaping the future of AI.
You'll leverage your subject-matter expertise to train and evaluate AI models,
ensuring the information they generate is reliable and relevant across various domains.
This position offers a unique path for professional growth,
allowing you to hone your AI skills while expanding your knowledge base.

Your Day to Day includes:

- *Assessing the quality of AI-generated code and providing human-readable summaries explaining your evaluation.*
- *Solving coding problems by writing functional and efficient code.*
- *Creating human-readable summaries of coding problems and their solutions.*

Requirements

About You:

- *Fluency in English with the ability to articulate code and abstract concepts clearly.*

Proficiency with one or more of the following programming languages is preferred:
Python, Java, JavaScript/TypeScript, SQL, C/C++/C#, and/or HTML.
Bachelor's degree in Computer Science or equivalent. Students are welcome.
Proficiency working with any of the following (in addition to the languages above):
Swift, Ruby, Rust, Go, .NET, Matlab, PHP, HTML, DART, R, Apex, and Shell.
Interest in AI and machine learning concepts.

Important Information

This is a freelance position compensated on an hourly basis.
Please note that this is not an internship opportunity.
Candidates must be authorized to work in their country of residence,
and we do not offer sponsorship for this 1099 contract role.
International students on a valid visa may be eligible to apply;
however, specific circumstances should be discussed with a tax or immigration advisor.
We are unable to provide employment documentation at this time.
Compensation rates may vary for non-US locations.

Pay Range (rate per hour): $15—$150 USD

Excel in a remote-friendly hybrid model.
We are dedicated to achieving excellence and recognize the importance of bringing our talented team together.
While we continue to embrace remote work,
we have transitioned to a hybrid model with a focus on nurturing collaboration and connection
within our dedicated tech hubs in the San Francisco Bay Area, New York City Metro Area, and Wrocław, Poland.
We encourage asynchronous communication, autonomy, and ownership of tasks, with the added convenience of hub-based gatherings.

Additional Information

Your Personal Data Privacy: Any personal information you provide Labelbox as a part of your application
will be processed in accordance with Labelbox's Job Applicant Privacy notice.
Any emails from Labelbox team members will originate from a Labelbox email address.
If you encounter anything that raises suspicions during your interactions,
we encourage you to exercise caution and suspend or discontinue communications.
If you are uncertain about the legitimacy of any communication you have received,
please do not hesitate to reach out to us for clarification and verification.

Copilot

Based on the AI Tutor - Coding job description and your CV, here are the key skills to highlight:

1. **Proficiency in Programming Languages** – The job specifically mentions Python, Java, JavaScript, SQL, and HTML. Your experience with Python, Java, and web development (HTML, JavaScript, PHP) makes you a strong fit.
2. **AI and Machine Learning Knowledge** – You've developed AI-powered tools and worked with models like Gemini and Hugging Face, which aligns well with training and evaluating AI models.
3. **Problem-Solving and Software Development** – Your ability to design and deploy AI-driven applications fits perfectly with the role's requirement to solve coding problems and write functional, efficient code.
4. **Data Analysis and SQL Skills** – Your database knowledge and experience with SQL can be valuable for assessing AI-generated code accuracy.
5. **Technical Research and Documentation** – You've authored business reports on AI mitigation strategies, which ties into the job's need for human-readable summaries of AI-generated code and coding problems.
6. **Teamwork and Collaboration** – Your experience in Agile environments, internships, and lab demonstrator roles shows that you work well with teams and can clearly articulate abstract coding concepts.
7. **Cloud and DevOps Awareness** – Your familiarity with AWS, Azure, and Google Cloud AI tools enhances your suitability for AI development tasks.

Would you like me to refine how you present these skills in your CV or tailor them further for this role? Let me know how I can assist!

You

(Now Tuesday, May 6)
What skills should I include for this role:

Who we are

Kalisa is a fast-growing AI start-up enabling the next generation of professional services.
Our platform helps organisations turn their knowledge and expertise into chat agents, automated workflows and AI-powered experiences—securely, reliably, and at scale.

We are based in the UK and service a rapidly growing client base around the world.
Due to this continued growth we are expanding our engineering team to help us scale our platform and build new functionality.

We are at the start of the GenAI revolution, and this is an opportunity like no other.
If you think you are the right person for the role, we encourage you to apply and look forward to hearing about your tech journey.

Who you are

We are seeking an experienced Flask Python AI Engineer with LangChain Experience with a proven track record in building and deploying production-grade GenAI applications.

You will join a small, agile, and passionate team to enhance and scale our GenAI platform.

This will involve working closely with our team to deliver new features, improve existing functionality, and ensure seamless integration with new foundation models as they become available.

You will be able to work independently, be self-sufficient, eager to learn, be able to build something from scratch and see it through to completion.

As a key team member, you will:

Architect & Implement: Design, build, and maintain reliable, scalable, and high-performance Python services within a Flask-based ecosystem.

Front-End Enhancement: Leverage HTMX and Tailwind CSS to create an engaging, dynamic and responsive user interface, minimising JavaScript overhead and improving the overall user experience. No prior HTMX experience is required.

GenAI Integration: Work with LangChain to implement prompt engineering techniques, RAG pipelines, and intelligent agent capabilities.

RAG & Vector Databases: Implement and optimise RAG strategies, semantic search capabilities, and embeddings-based retrieval; integrate and manage vector databases.

Relational Databases: Leverage MySQL and SQLAlchemy as the ORM to design robust, optimised schemas and implement efficient data retrieval and storage strategies.

Cloud Deployment: Integrate and deploy services across cloud platforms (Azure, AWS, GCP), ensuring robust infrastructure, monitoring, and observability.

Data Security & Compliance: Collaborate with security teams and architects to ensure data privacy, compliance, and reliable access controls within enterprise environments.

Continuous Improvement: Participate in code reviews, contribute to technical documentation, and proactively identify opportunities for platform optimisation and enhancement.

Requirements

Professional Experience:

Python Proficiency: Minimum of 1-3 years experience working with Python, the Flask framework, developing relational database-driven backend services, APIs and web apps.

Front-End Integration: Demonstrable experience of working with Tailwind CSS to implement responsive website and web app designs.

GenAI Expertise: A minimum of 1 year of experience building and shipping at least one GenAI product (e.g., LLM-based app, custom chatbot, RAG-driven knowledge platform).

LangChain: Demonstrable experience working with LangChain.

RAG & Vector Technologies: Demonstrable knowledge of RAG techniques, vector databases, semantic search, and embedding models.

Nice to have:

Front-End Integration: Working knowledge of HTMX to build dynamic web applications.

Cloud Platforms: Practical experience deploying and managing applications on at least one major cloud provider (Azure, AWS, or GCP).

Additional Requirements:

Based in the UK and authorised to work.

Strong communication skills and the ability to work effectively in a fully remote team environment.

Fluent English speaker and writer.

Most of our work is in written form, which means being a good writer is very important. The importance of high-quality writing is carried through our designs, internal project discussions, code comments and the code itself.

Self-starter mentality with a focus on delivering tangible results.

What We Offer

Competitive Pay: Based on your experience to date.

Fully Remote: Enjoy the freedom to work from anywhere in the UK.

Pension

25 Days Holiday + Bank Holidays

High Impact Work: Contribute to a fast-growing platform already used globally, enhancing your experience and portfolio.

Career Growth Opportunities: Work at the intersection of cutting-edge AI research, product innovation, and world-class engineering practices.

Latest Cloud & AI Technology: From AWS, Azure and GCP.

Learning and Development Opportunities: Including access to resources and mentorship.

A Friendly, Supportive and Passionate Team.

Our Hiring Process

Initial Interview, including GenAI project walkthrough: Meet with our CEO for an in-depth discussion about your experience, approach, and technical skills.

This is an opportunity for us to get to know each other and ensure we share the same vision and values.

You will also present a real-life GenAI project you have recently worked on. You will walk us through your design decisions, implementation details, and the overall outcome, giving us a chance to understand your problem-solving approach and coding style.

Technical Challenge: If you are successful in the initial interview, you will be invited to complete a technical challenge that will be briefed based on your experience. We expect this to take 1-2 days, and you will be compensated for your time.

If you are excited about pushing the boundaries of what is possible with GenAI and you meet the above criteria, we would love to hear from you.

Copilot

For the Flask Python AI Engineer role at Kalisa, here are the most relevant skills from your CV to include:

1. **Python Proficiency** – You have strong experience with Python, including building AI-powered applications and automation tools.
2. **GenAI & LangChain Expertise** – Your work with AI models like Gemini and Hugging Face aligns well with the company's focus on GenAI applications.
3. **Cloud Deployment & DevOps** – Your familiarity with AWS, Azure, and Google Cloud Workspace matches their need for cloud deployment experience.
4. **SQL & Database Management** – Your solid understanding of database systems and SQL skills are relevant to their need for MySQL and SQLAlchemy proficiency.
5. **Web Development** – Your experience with HTML, JavaScript, and PHP complements their interest in front-end enhancement with Tailwind CSS.
6. **Problem-Solving & AI Applications** – Your ability to design and deploy AI-driven solutions, such as document extraction apps and workflow automation, directly supports their RAG and vector database needs.
7. **Technical Research & Documentation** – Your experience authoring business reports on AI solutions shows your ability to articulate concepts clearly, which is essential for working in a remote environment.

Would you like me to help refine your CV further or craft a tailored cover letter for this role? Let me know how I can assist!

You

How about for this job:

About the job

Job Requisition ID #25WD86831

Position Overview

As an Intern in Autodesk Research's AI Lab, you'll apply advanced machine learning techniques to help our customers create a better, safer, more sustainable world. You'll join a team of researchers, engineers, and industry domain experts working on projects that range from learning-based design systems, computer vision, graphics, robotics, human-computer interaction, sustainability, simulation, manufacturing, architectural design and construction.
We're passionate about making design tools to ensure design exploration (getting to alternative design solutions), design automation (getting to the finished design faster), and sustainable design (with less negative impact).
Autodesk's AI Lab is active in the wider research community, targeting publications at NeurIPS, ICML, ICLR, and other top-tier conferences. We collaborate with top academic and industry labs, combining the best of an academic environment with product-driven research.

Responsibilities
Managing your project end-to-end, working on machine learning research applied to 3D generation.
Partner with different teams to solve important problems across the Autodesk organization.

Minimum Qualifications
Full-time student pursuing an MS or Ph.D. (preferred) in Computer Science, Computational Design, Graphics, Machine Learning or a discipline in an accredited program with at least one academic term to complete post-internship
Broad understanding of machine learning and deep learning
Excellent Programming and software development skills, with experience in Python
Proficient with ML & DL platforms & libraries (PyTorch, TensorFlow, Keras, scikit-learn, etc.)
Experience conducting research and publishing results
An excellent communicator and team player
Knowledge of 3D computer graphics, computational geometry, and 3D geometry manipulation
Deep expertise in an area such as computer vision, 2D/3D geometry representation learning, and/or generative models

Preferred Qualifications
Interest or experience in animation, visual effects, or game design
Experience with 3D modeling, rigging, or animation software

Learn More About Autodesk

Welcome to Autodesk! Amazing things are created every day with our software – from the greenest buildings and cleanest cars to the smartest factories and biggest hit movies. We help innovators turn their ideas into reality, transforming not only how things are made, but what can be made.
We take great pride in our culture here at Autodesk – our Culture Code is at the core of everything we do. Our values and ways of working help our people thrive and realize their potential, which leads to even better outcomes for our customers.
When you're an Autodesker, you can be your whole, authentic self and do meaningful work that helps build a better future for all. Ready to shape the world and your future? Join us!

Salary transparency

Salary is one part of Autodesk's competitive compensation package. Offers are based on the candidate's experience, educational level, and geographic location.

Diversity & Belonging
We take pride in cultivating a culture of belonging and an equitable workplace where everyone can thrive. Learn more here: https://www.autodesk.com/company/diversity-and-belonging

Copilot

For the Autodesk Research AI Lab internship, here are the most relevant skills from your CV that you should highlight:

1. **Machine Learning & AI Development** – Your experience developing AI-powered tools, including document extraction and speech-to-text applications, aligns well with the machine learning research aspect of the role.
2. **Python & Software Development** – Your proficiency in Python, particularly in AI application development, matches their requirement for excellent programming skills.
3. **ML & DL Platforms** – You've worked with Google AI APIs and models like Gemini and Hugging Face, which complements their need for experience with ML/DL libraries such as PyTorch and TensorFlow.
4. **Problem-Solving & Research** – Your internship involved researching AI solutions and authoring a report on AI mitigation strategies, showing your analytical and research skills.
5. **Database & Cloud Skills** – Your familiarity with SQL, AWS, Azure, and Google Cloud Workspace is relevant to managing and deploying AI models.
6. **Communication & Teamwork** – As a Lab Demonstrator and IT Automation Officer, you've worked collaboratively, demonstrating strong teamwork and communication skills.
7. **Computational Geometry & Graphics Understanding** – While not explicitly mentioned in your CV, your problem-solving experience and technical expertise indicate an ability to grasp computational geometry, which is useful for 3D generation tasks in this role.

Would you like help tailoring your CV for this internship or crafting a compelling cover letter? Let me know how I can assist!

You

(Now Friday, May 9)
How about tailoring my CV skills for this job:

Your new role
In your new role, you will be instrumental in the development of business-specific applications that unlock the power of Microsoft's low-code tools, whilst acting as both an engineer and a consultant, designing, delivering, documenting, training, and supporting impactful solutions whilst providing expert guidance throughout the project lifecycle.

You will be designing, building, documenting, training and delivering end-to-end applications using the Power Platform toolset, whilst providing post-delivery support, knowledge transfer, and capability uplift for end-users and internal teams.
You will be engaging directly with the internal business users to understand challenges, define requirements and shape solutions.

What you'll need to succeed
Experience of the MS 365 suite, PowerApps, Power Automate, SharePoint Online
Experience of building Power Automate Cloud
Proven track record of development within Microsoft Power Platform Suite
Familiarity with SharePoint, JSON/XML, MS365, and third-party SaaS application integration
Excellent interpersonal skills
Ability to partner with multiple stakeholders and influence systems design and development

What you need to do now
If you're interested in this role, click 'apply now' to forward an up-to-date copy of your CV, or call us now.

If this job isn't quite right for you, but you are looking for a new position, please contact us for a confidential discussion about your career.

Hays Specialist Recruitment Limited acts as an employment agency for permanent recruitment and employment business for the supply of temporary workers.
By applying for this job you accept the T&C's, Privacy Policy and Disclaimers which can be found at hays.co.uk

Copilot

For this role focused on Microsoft Power Platform development, here are the most relevant skills from your CV:

1. **Microsoft Power Platform Expertise** – Your experience creating business tools with Power Apps and Power Automate directly aligns with the job's focus on building low-code applications.
2. **SharePoint Knowledge** – You've recorded tutorials for colleagues on SharePoint, showing your familiarity with SharePoint Online, which is a key requirement.
3. **Cloud & DevOps Awareness** – Your background with AWS, Azure, and Google Cloud Workspace fits well with the company's need for cloud integration experience.
4. **Problem-Solving & Process Automation** – You've developed AI-powered tools and custom business applications, demonstrating your ability to build impactful solutions and streamline workflows.
5. **Data Handling & Integration** – Your experience with SQL databases and automation ensures that you understand structured data processes, supporting the need for JSON/XML and third-party SaaS integration.
6. **Consultation & Communication Skills** – Your role as a Lab Demonstrator and IT Automation Officer has involved training and documentation, making you well-suited for engaging with stakeholders and knowledge transfer.
7. **Agile & Collaborative Workstyle** – You have experience working in Agile-style environments, which is valuable for collaborating with stakeholders on system design and development.

Would you like me to help tailor your CV further or refine your cover letter for this role? Let me know how I can assist!

You

Can you write me a cover letter that accurately highlights my skills and experiences?

Copilot

Absolutely! Based on your CV and the job description, here's a well-crafted cover letter that highlights your skills and experience in a compelling way.

Hasan Akhtar
24 Bargrange Avenue, Shipley, West Yorkshire BD18 2AA
07359 054 199 | akhtarhasan2005@gmail.com
LinkedIn Profile

Dear Hiring Manager,
I am excited to apply for the [Job Title] role at [Company Name]. With a strong foundation in AI development, cloud computing, and automation, I am eager to contribute my technical expertise and problem-solving skills to drive impactful solutions within your team.

During my role as an IT Automation Officer at Bradford Children and Families Trust (BCFT), I developed and deployed AI-powered applications that streamlined workflows and enhanced productivity. I designed an AI-driven document extraction tool in Python, built a Work Hours calculator using Microsoft Power Apps, and implemented automation solutions with Power Automate—all of which contributed to operational efficiency. Additionally, my research on AI mitigation strategies gave me insight into the challenges of AI-driven solutions, ensuring informed decision-making in development.

Beyond my professional experience, I have a strong background in cloud platforms, including AWS, Azure, and Google Cloud Workspace. My ability to work in Agile environments and collaborate effectively makes me confident in partnering with teams to develop innovative and scalable AI solutions. Furthermore, my expertise in web development, SQL, and cyber security awareness allows me to build secure and efficient applications tailored to business needs.

I am excited about the prospect of joining your team and applying my skills to [Company Name]'s mission. I would welcome the opportunity to discuss how my experience aligns with your needs. Please find my CV attached for your review. I look forward to hearing from you.

Best regards,
Hasan Akhtar

Would you like any modifications to tailor it further? I can adjust the tone or highlight specific experiences based on the job requirements!

You

(Now Saturday, May 24)
How about tailoring my CV skills to this role:

RegGenome is a regulatory data technology company and a leader in the field of computational regulation, changing how the world produces and consumes regulatory information.
As a regulatory data provider, we process the world's regulation using AI to transform what is human-readable into machine-readable and machine consumable data.
RegGenome is a commercial spin-out of the Regulatory Genome Project (RGP), a pioneering public-private partnership with the University of Cambridge, Judge Business School, that aims to build universal information structures for describing regulation to create a regulatory commons.

Our team benefits from a strong connection to the University, bringing together deep expertise in scaling tech start-ups, developing NLP/ML models, and collaborating with regulatory communities.
Following a successful seed funding round of £4.7 million in March 2022, we have established a solid product market fit and are experiencing significant commercial traction with global regulatory bodies and prominent international financial organisations.

Building on this momentum, we are now finalising our Series A funding round and preparing to expand our team across all areas.
This is an exciting moment to join us on our journey as we leverage AI to create a world-leading repository for regulatory information.

What we are looking for:

We are looking for a mid-level Python Backend Engineer to join our remote-first cross-functional tech team.

We have developed a core document-processing capability for a rapidly expanding corpus of published regulations and supported regulatory themes which process millions of documents through several hundred ML models. Working with us, you will gain extensive experience in applied AI for very large-scale document processing and delivery. Skills that are incredibly relevant to the industry today.

Reporting directly to the Head of Engineering, you will work closely with senior infrastructure engineers, pipeline developers, ML engineers, UI developers, document quality specialists, legal experts and product managers to enhance and improve our data model, the AI-driven document processing pipeline, API layers, internal tools and UIs.
You will create high-level and detailed designs, as well as work collaboratively regards coding best practices, PR reviews, troubleshooting, production monitoring, and code efficiency.

About you:
- *You're an experienced engineer spanning backend used to working in Python*
- *You like to own the whole solution, from database schema design to API format and UI design principles*
- *You'll be comfortable working with Agile, testing work and deploying to production multiple times each day*
- *You are organised, detail-orientated, and able to seek out information from colleagues to guide your decision-making in a remote-first organisation*
- *You understand the importance of structuring work in Jira in epics, stories/tasks and sub-tasks, organising and combing the backlog, adjusting priorities to match business needs, and documenting clearly decisions in ticket comments, Notion pages and customer-facing engineering documentation*

You're able to make explicit, reasoned, decisions trading off short and long-term requirements, for example by prioritising speed of delivery or reliability depending on the circumstances

Your experience:
Several years production experience with Python 3
Experience with database schema design and an understanding of optimisations for read-heavy write-heavy workloads with PostgreSQL
Production experience with API design & benchmarking especially JSON REST APIs and FastAPI
Excellent coding skills and an appreciation for best-practises in coding, PR reviewing, and agile development with daily deliveries to production
Experience in AWS and/or GCP

Nice to have:
Experience with Typescript, React and UI coding best practises
Experience with Kubernetes
Experience with asynchronous pipeline processing technologies, and in particular, Temporal
Experience working in the context of a growing organisation from start-up to scale-up
Experience remote-working with international teams

What we offer:
A flexible remote-working environment
Ample opportunity to grow with the company as we scale
Share options
25 days holiday in addition to UK Bank Holidays
Laptop
5 days a year of personal development time

We are only accepting applications from candidates able to work in the UK at this time.

Copilot

For the Python Backend Engineer role at RegGenome, here are the most relevant skills from your CV that you should highlight:

1. **Python Proficiency** – Your strong experience with Python, particularly in AI-powered applications and automation, matches their requirement for backend development with Python 3.
2. **Database & SQL Skills** – Your solid understanding of SQL and database systems aligns well with their need for database schema design and PostgreSQL optimization.
3. **API Development & Web Technologies** – Your experience with web development, including PHP, JavaScript, and web APIs, supports their requirement for JSON REST APIs and FastAPI experience.
4. **Cloud & DevOps Awareness** – Your familiarity with AWS and Azure makes you a great fit for their cloud deployment needs.
5. **AI & Machine Learning Knowledge** – Your work with AI-driven applications and models such as Gemini and Hugging Face aligns with their focus on applied AI for large-scale document processing.
6. **Agile & Collaborative Workstyle** – Your experience in Agile environments, internships, and as a Lab Demonstrator demonstrates your ability to work effectively with cross-functional teams.
7. **Problem-Solving & Process Automation** – Your ability to design and deploy AI-powered tools, including automation solutions, aligns well with troubleshooting, production monitoring, and code efficiency responsibilities.

Would you like me to tailor your CV or craft a cover letter for this role? Let me know how I can assist!

You

(Now Sunday, May 25)
How can I answer this question for a tutoring job:
How would you describe yourself and who are your lessons aimed at?

Copilot

You can answer this question by highlighting your skills, teaching approach, and the type of students you cater to. Here's a strong response tailored to your experience:

"I am a passionate and adaptable tutor with a strong background in Computer Science, AI, and software development. My approach to teaching is structured yet engaging, ensuring that students not only grasp technical concepts but also develop problem-solving skills that they can apply in real-world scenarios. I aim to create a supportive and interactive learning environment where students feel confident asking questions and exploring new ideas.

My lessons are designed for students at various levels—from beginners looking to understand programming fundamentals to more advanced learners seeking to refine their AI and software development skills. I tailor each lesson to match the student's pace and learning style, making complex topics accessible and practical. Whether guiding university students through coursework, mentoring aspiring developers, or helping professionals upskill, I focus on delivering knowledge in a way that is clear, structured, and results-driven."

Would you like me to adjust this to make it even more personalized for your specific tutoring focus? Let me know how I can refine it for you!

You

The answer has to be max 20 words, I also want to mention Maths and Physics, how can I restructure my response?

Copilot

I teach Computer Science, AI, Maths, and Physics with a structured, engaging approach, tailored for students at all skill levels.

You

Can you give me a response for this one in much more details (max 350 words): Briefly explain how you will teach

Copilot

My teaching approach is structured, engaging, and tailored to individual learning styles. I focus on breaking down complex concepts into simple, digestible lessons, ensuring that students understand both theoretical foundations and practical applications.

I begin by assessing the student's current knowledge level and identifying areas that need improvement. Based on this, I design lessons that combine conceptual explanations with hands-on problem-solving exercises. Whether teaching Computer Science, AI, Maths, or Physics, I emphasize logical thinking, step-by-step reasoning, and real-world relevance.

For Computer Science and AI, I integrate coding exercises, algorithm walkthroughs, and interactive examples to reinforce programming concepts. I ensure students not only understand syntax but also develop the ability to approach problems critically and design efficient solutions. I make use of practical projects, including AI-powered applications, so students can apply their learning effectively.

In Mathematics, I focus on building strong foundational skills. I explain theories with clarity, use visual aids where helpful, and encourage active problem-solving. I help students develop an intuitive understanding of mathematical concepts rather than relying solely on memorization.

For Physics, I demonstrate core principles through practical examples, simulations, and real-world applications. I ensure students grasp not only formulas but also how to apply them logically in different scenarios. I encourage curiosity and deep thinking by posing thought-provoking questions that connect theory to real-world phenomena.

Throughout my teaching, I foster an interactive environment where students feel comfortable asking questions and exploring ideas. I adapt my approach based on feedback, ensuring concepts are understood thoroughly before progressing to advanced topics. I also incorporate exam strategies, problem-solving techniques, and personalized practice exercises to strengthen retention.

Ultimately, my goal is to build confidence, enhance problem-solving abilities, and inspire a passion for learning. By making lessons engaging and tailored to individual needs, I ensure students leave each session with a deeper understanding and the tools needed to excel academically and beyond.

You

What price per hour should I put based on my skills and abilities?

Copilot

Your hourly rate should reflect your expertise in AI, programming, Mathematics, and Physics, along with your hands-on experience in software development, cloud platforms, and tutoring. Here are some factors to consider:

- **Market Rates for Tutors:** Depending on the level (beginner, university, professional upskilling), tutoring rates typically range from **£20 to £70 per hour** in the UK.
- **Your Technical Expertise:** Since you have hands-on experience with AI, Python, cloud computing, and automation, you could set your rate at the higher end, especially for advanced-level tutoring.
- **Academic & Professional Experience:** Given your strong academic background and internships, charging between **£30-£50 per hour** would be competitive.
- **Specialized Subjects:** AI and programming tutoring can command **£50+ per hour**, particularly for advanced topics like deep learning or software engineering.

If you're offering tutoring for school-level Maths and Physics, you might charge closer to **£25-£40 per hour**, while specialized AI/Computer Science training could range **£40-£70**. Would you like help refining your tutoring pitch to highlight your expertise and justify a premium rate?

You

how about this question, in 250 words: Tell your potential students what your lessons are like: the format you use, the content or dynamics of the lessons, your experience, etc.

Copilot

My lessons are structured, engaging, and tailored to each student's needs. I focus on creating a learning environment where students feel confident in tackling complex concepts and building problem-solving skills.

Each session begins with a brief review of previous topics to reinforce understanding. I then introduce new concepts in a clear, step-by-step manner, ensuring students grasp the fundamentals before diving into practical applications. Depending on the subject—Computer Science, AI, Mathematics, or Physics—I use interactive demonstrations, coding exercises, worked examples, and real-world applications to keep lessons dynamic and engaging.

For Computer Science and AI, I guide students through programming challenges, algorithm development, and AI model creation, helping them apply theory to real-world scenarios. Mathematics lessons emphasize logical thinking, with problem-solving exercises that enhance analytical skills. Physics lessons incorporate visual aids and thought-provoking discussions to deepen conceptual understanding.

I encourage active participation, asking students to explain concepts in their own words and apply their knowledge through structured exercises. Lessons are adaptable, whether a student prefers hands-on coding, detailed explanations, or structured exam preparation.

With experience as a lab demonstrator, internship researcher, and AI developer, I bring real-world expertise to my teaching. I support students at all levels—whether they're beginners looking for guidance or advanced learners wanting to refine their skills. My goal is to make learning effective, enjoyable, and tailored to each student's aspirations.

Ready to elevate your understanding? Let's learn together!

You

(Now Sunday, Jun 1)
How can I adjust my CV Skills for this job:

The summer internship is for university students who are in their penultimate year.
Working alongside our Software Developers you'll get the opportunity to work on exciting new projects, developing cutting-edge software.
Our interns typically join us for 8 to 12 weeks but we are flexible on duration and start dates.

Our Software Developers work on a wide variety of projects as part of an agile development environment. Interns are involved in the full software cycle and work closely with all teams across the company as they scope out new projects and design, develop and deploy our solutions.

In the past, interns have worked on projects including:
• Development of iOS and Android apps for patients and clinicians
• Technologies to aid in public health and clinical trials
• Writing a new platform for sharing clinical tools
• Integration with Apple's HealthKit
• Artificial Intelligence in healthcare

A reminder that these are the skills I have to choose from, just let me know which 6-7 are most relevant and in what order I should include them in my CV skills sections?

CV Skills:
- *Technical Research - Authored business reports on AI mitigation strategies.*
- *Strategic Thinking and Problem-Solving - Demonstrated ability to solve real-world problems through Internship experience and Programming Projects, YouTube channels, etc.*
- *DevOps and Cloud Awareness - Familiar with AWS and Azure, also created multiple AI applications in Google Cloud Workspace.*
- *Teamwork and Collaboration - Worked effectively in Agile-style environments through group projects, internships, and as a Lab Demonstrator.*
- *Problem-Solving - Designed and deployed innovative solutions like AI-powered tools and custom business applications for real-world challenges.*
- *Eagerness to Learn - Continuously developed technical and professional skills through certifications, internships, and academic projects.*
- *Data Analysis & AI - Developed AI-powered tools and analysed consumer trends.*
- *SQL and Database Skills – Solid understanding of database systems.*
- *Cyber Security Awareness – Exposure to secure coding practices and systems management in technical projects and internships.*
- *Microsoft Power Platform - Created business tools using Power Apps, Power Automate and other Power Platform tools.*
- *Web Development - Proficient in HTML5, CSS, JavaScript, PHP, web API, etc.*
- *High academic achievement with a first-year average of 88%.*
- *Proficiency in programming languages, particularly Python & Java.*
- *Software Project Management – experienced in timely and quality delivery.*
- *Mathematics – advanced understanding of mathematical concepts applied in computing and data analysis.*
- *Android Studio, android app development.*

Copilot

For this software development internship, the most relevant CV skills to include, in order of importance, are:

1. **Proficiency in Programming Languages (Python & Java)** – Essential for software development and aligns with AI applications in healthcare.
2. **Web Development** – Experience in HTML5, CSS, JavaScript, PHP, and web APIs supports the role's potential focus on platform development.
3. **Data Analysis & AI** – Developing AI-powered tools matches their focus on artificial intelligence in healthcare.

4. **Android Studio, Android App Development** – The job description mentions Android app development for patients and clinicians, making this a highly relevant skill.
5. **SQL and Database Skills** – Solid understanding of database systems is useful for developing clinical tools and integrating technologies.
6. **Teamwork and Collaboration** – Working in Agile-style environments ensures you can adapt to the internship's collaborative software development approach.
7. **Problem-Solving** – Your experience designing and deploying AI-powered tools highlights your ability to create solutions for real-world applications.

Would you like me to refine your CV further or tailor specific skill descriptions to match this role more precisely? Let me know how I can assist!

(Now Tuesday, Jun 3)
How can I tailor my CV for this role?

Who we are

We are Wiser, an award-winning employer branding agency.
We transform a company's employer brand and change cultures from the ground up.
With creative, strategic and early talent experts in-house, we deliver end to end campaigns,
helping our clients to attract and retain the best talent globally.

Our mission is to change the way people think about work and that's
what we've created at Wiser - a culture where everyone can be real and back themselves,
surrounded by high performers who take ownership of their career and make moves, no matter what their background.

To find out more about us, take a look at our website wearewiser.com or check us out on Instagram @wearewiser

About Wiser Academy
Wiser Academy is an award-winning network of over 200 student ambassadors and team leads across 70+ universities in the UK and Ireland.
We train and support students to represent leading graduate employers like Clifford Chance, KPMG, and L'Oréal, by promoting their opportunities on campus and online.
Ambassadors gain access to paid, flexible work that fits around their studies, as well as development workshops, exclusive events, and a community of high-performing peers.

Find out more about Wiser Academy through our website or on socials:

TikTok
Instagram
LinkedIn

✦ *The Role*

As a Wiser Academy Ambassador, you'll represent our clients' brands on your university campus.
Whether it's creating scroll-stopping TikToks, planning events on campus with your team,
publishing a catchy LinkedIn post or helping peers navigate the application process - this role is all about authentic promotion,
community-building, and referring top talent in your network to apply for their dream opportunities.

If you're also interested in becoming a Team Lead, check out the job spec here.
You don't need to apply for both, we will consider you for the Ambassador role if you are not successful applying to be a Team Lead

Here's what you'll get up to:

- Attend a virtual 'Ignore the Ordinary' training day to learn everything you need about the role and the clients you'll be representing
- from insider recruitment tips to employer benefits, culture, and roles. Upskilling after the session to remain knowledgeable and informed about all clients you're representing
- Showcase leading brands by completing creative monthly tasks (in-person + online)

- Create fun and engaging content to promote opportunities on social media, adhering to each clients' brand guidelines
- Attend clients events on campus, and run independent stalls to engage with top talent, use your initiative to spot opportunities where Wiser Academy and clients can be promoted
- Make peer-to-peer referrals and offer support throughout the candidate journey
- Attend client office visits, capturing the culture and day-to-day life to promote to your networks
- Build strong team relationships - contribute to monthly team meetings, collaborate for relevant team tasks, and flag concerns to your designated team lead

🚀 *What's in it for you?*

- Get paid for every task completed, plus referral bonuses at the end of the year
- Pick which tasks you do, when in the month you complete them (where relevant), and build your personal brand on socials along the way
- Gain real-world experience with global brands
- Upskill through learning and development sessions and access events that give you exposure to top employers
- Build your network with fellow ambassadors, establishing your personal brand on campus
- Enjoy an end of year celebration to highlight your achievements and reward hard work

👀 *Who we're looking for*

If you're on socials, love connecting people, and want to build your experience in marketing, events, and recruitment - we want to hear from you.

📩 *Apply now*

Sound like your thing? Hit apply and we'll be in touch

Copilot

To tailor your CV for this Wiser Academy Ambassador role, highlight skills related to **social media engagement, communication, networking, and marketing**. Here are the most relevant skills from your CV:

1. **Teamwork and Collaboration** – Your experience working effectively in Agile-style environments and as a Lab Demonstrator demonstrates your ability to engage with teams and collaborate on projects.
2. **Strategic Thinking and Problem-Solving** – Your ability to solve real-world problems through internships, programming projects, and content creation aligns with the role's creative and promotional tasks.
3. **Microsoft Power Platform** – Your experience building business tools with Power Apps and Power Automate could be useful for managing promotional campaigns and streamlining workflows.
4. **Communication & Networking Skills** – Your work as a Lab Demonstrator and internship experience highlight your ability to present information clearly, interact with peers, and engage audiences—key skills for events and social media promotion.
5. **Technical Research & Content Creation** – Your ability to author reports and create digital content could be valuable for crafting engaging posts and representing brands online.
6. **Eagerness to Learn** – The role involves training and adapting to brand messaging, making your continuous development of technical and professional skills a great asset.
7. **Web Development & Digital Tools Awareness** – Your experience with web technologies could be useful for online promotions, creative digital content, and managing brand visibility.

Would you like me to refine specific sections of your CV or craft a tailored cover letter for this role? Let me know how I can assist!

You

How can I answer this question:
This role involves representing brands online and in-person to your friends and coursemates.
Tell us something about you that would make you a great fit for this role!
Please explain your answer in fewer than 250 words.

Copilot

You can highlight your communication skills, social media presence, ability to engage with peers, and enthusiasm for branding. Here's a strong response:

"I thrive in collaborative environments and enjoy connecting with people, making me a strong fit for representing brands both online and in person. Through my experience as a Lab Demonstrator and internships, I've honed my ability to engage with diverse audiences, explain technical concepts clearly, and foster meaningful discussions.

Beyond academic and professional settings, I actively contribute to online communities through social media and content creation, where I use strategic communication to captivate audiences and encourage engagement. My background in software development and AI-powered tools also helps me understand how digital campaigns resonate with audiences.

Additionally, I am highly adaptable and eager to learn, ensuring that I align with brand messaging while maintaining authenticity. Whether promoting a campaign, hosting an event, or guiding peers through opportunities, I bring enthusiasm, creativity, and a strong sense of teamwork to everything I do."

Would you like me to refine this further based on specific aspects of your personality or experiences? Let me know how I can fine-tune it!

You

How can I answer this, focusing on my YouTube channels, various associated socials and the brand I'm building for the freelance business:
As an ambassador, we'll teach you how to level up your personal brand, and provide the tools and confidence required to promote our clients on social media - what experience do you have that you can bring to the table? Please explain your answer in fewer than 250 words.

Copilot

You can highlight your experience in content creation, audience engagement, and brand-building. Here's a strong response:

"I have hands-on experience in growing and managing digital platforms, including multiple YouTube channels and associated social media accounts. Through my content creation, I have developed skills in audience engagement, storytelling, and strategic promotion, ensuring my brand resonates with the right audience.

Additionally, I am building a freelance business where I leverage digital marketing and branding techniques to reach clients effectively. This has given me firsthand experience in positioning a brand, creating compelling messaging, and utilizing platforms like YouTube, LinkedIn, and other social channels to maximize visibility.

This role aligns perfectly with my experience, as I am already accustomed to crafting high-impact promotional content, fostering online communities, and analyzing social media engagement to refine strategies. I am excited to apply these skills while also learning new approaches to enhance both my own brand and the brands I will represent as an ambassador."

Would you like me to refine this further based on specific aspects of your content style or business goals? Let me know how I can make it even stronger!

You

How can I answer this question, what should I say in the recording?
What excites you about representing ambitious employers to your peers? Wiser Academy ambassadors are curious, connected, and confident in their ability to champion opportunities to the right people. Tell us why you're drawn to this role - whether it's the brands, the mission, the creativity, or something else entirely. Please ensure your recording is under 2 minutes.

Copilot

In your recording, focus on enthusiasm, storytelling, and personal connection to the role. Here's a solid structure to follow:

1. Introduction (10-20 seconds)

Start with a confident introduction:
"Hi, I'm Hasan, and I'm excited about the opportunity to be a Wiser Academy Ambassador! I thrive on connecting with people, promoting great opportunities, and building communities—so this role is a perfect fit for me."

2. What Draws You to the Role? (40-60 seconds)

Highlight your interest in the mission and brands:
"What excites me most is the chance to represent ambitious employers and help students discover opportunities they may not have considered. Through my YouTube channels and freelance business, I've gained experience in content creation, networking, and brand promotion. I love using social media to engage audiences, and I know how to create compelling content that resonates with people. As an ambassador, I'd bring creativity and strategic thinking to ensure employers connect with the right talent."

3. Your Unique Skills (40-60 seconds)

Showcase why you're a great fit:
"I'm deeply connected to student communities and have experience presenting ideas in a relatable way. Whether it's through events, social media, or peer-to-peer referrals, I know how to build trust and encourage engagement. I'm also passionate about helping others succeed, which is why I'm excited to champion exciting career opportunities!"

4. Conclusion (10-20 seconds)

Wrap up with enthusiasm:
"I can't wait to bring my energy, creativity, and networking skills to Wiser Academy. Thanks for listening!"

Let me know if you'd like me to adjust any part or make it more personalized to your style!

You

How can I add the key points I took away from the initial ad as well:

We're on the lookout for students making the most of university life beyond studying, keen to get one step ahead for their career after uni.

Heard of the Wiser Academy?
Join our next cohort of campus ambassadors and represent a premium group of graduate employers including the likes of KPMG,
Clifford Chance and L'Oréal. If your CV wasn't looking shiny enough, on the Wiser Academy you'll take your employability to the next level all whilst getting paid!

Be the first to know about grad schemes and internships, gain access to exclusive events and take part in developmental training along the way.

This flexible, part-time job will complement your busy schedule

Copilot

You can integrate these key points into your response by highlighting how the role aligns with your experience and ambitions. Here's a revised version of your recording script that includes the takeaways from the ad:

"Hi, I'm Hasan, and I'm excited about the opportunity to be a Wiser Academy Ambassador! I'm always looking for ways to make the most of university life beyond studying, and this role perfectly aligns with my passion for networking, content creation, and helping peers discover amazing opportunities.

What excites me most is the chance to represent ambitious graduate employers like KPMG, Clifford Chance, and L'Oréal—brands that can truly shape students' careers. With my experience running YouTube channels and building my freelance business, I understand how to engage audiences, promote brands authentically, and connect people with valuable opportunities.

Beyond the marketing aspect, I see this role as a way to level up my own employability while making an impact on campus. Attending exclusive events, gaining insight into grad schemes and internships, and developing professionally with Wiser Academy are exciting prospects that align with my future career goals.

Since I actively create social media content and engage with student communities, I'm confident I can represent these brands effectively while supporting my peers through the application process. I'm eager to bring creativity, energy, and strategy to this ambassador role and grow both personally and professionally.

I can't wait to get started and be part of this incredible network!"

This version integrates the themes of **career-building, employability, networking, and professional growth** while tying in your personal experience. Let me know if you'd like any refinements to make it sound even more natural!

You

(Now Friday, Jun 13)
I've got an upcoming interview for teh Wiser academy, based on these messages and information I've collected and attached document tehy sent me, how can I prepare for the interview:

Initial Message:

You've been spotted! Have what it takes to be a campus brand ambassador?

Hey Akhtar,

We're on the lookout for students making the most of university life beyond studying, keen to get one step ahead for their career after uni.

Heard of the Wiser Academy?

Join our next cohort of campus ambassadors and represent a premium group of graduate employers including the likes of KPMG,
Clifford Chance and L'Oréal. If your CV wasn't looking shiny enough, on the Wiser Academy you'll take your employability to the next level all whilst getting paid!

Be the first to know about grad schemes and internships, gain access to exclusive events and take part in developmental training along the way.

This flexible, part-time job will complement your busy schedule but don't just take it from us, hear it from our current ambassadors in this video:
https://www.instagram.com/reel/DI_b6FBtnkC/?utm_source=ig_web_copy_link&igsh=MzRlODBiNWFlZA==

Keen to learn more? Let me know and I'll send you the details 👀

Gia Watkins
Academy Lead @ Wiser | CIPD Qualified | Heading up our award-winning ambassador programmes, to tackle early talent hiring challenges for leading employers 🏆

Follow-up message:

Thanks so much for getting back to me and sorry for the late reply, I've been on holiday!

Great that you're interested in hearing more. Check out the job here:
https://wiser.teamtailor.com/jobs/5897552-wiser-academy-ambassador

Or if you want to throw your hat in the ring for our team lead position, apply here:
https://wiser.teamtailor.com/jobs/5895704-wiser-academy-team-lead

You can also check us out on Instagram
@wearewiseracademy.

Any questions, just let me know.

After Applying:

Hey Akhtar

Thanks for applying, we're buzzing that you're interested in joining Wiser Academy 2025/26!

Applications are currently being reviewed. Keep an eye on your inbox as we'll aim to get back to you shortly with next steps.

In the meantime, here's a sneak peek into life as a Wiser Ambassador:

🖼️ *Check out our deck:The Inside Scoop*
💬 *Hear from current Ambassadors & Team Leads: See what they're saying on LinkedIn*

We can't wait to connect with you soon.

Best,
The Academy Team

Interview Invite:

Congratulations, you're through to the second round of the application process for becoming part of next year's Wiser Academy ✨

We've loved getting to know you in the application process so far, and now is your chance to get to know us a little better, too.

Please follow this link below to book in a 15 minute video call with one of the Academy Team.

We'll check your understanding of Wiser, what you're up to at uni in terms of commitments, and then a couple of questions about how you might handle certain situations in your role on the Academy.

We look forward to speaking with you!

Other Information:

Make friends, make industry connections, make steps towards your future career... AND get paid for it?

It's not too good to be true, it's the Wiser Academy. Applications open in May 👀

Have a sneak peak at the Academy Team Leads for our 2024/25 cohort 🤩

They'll be joining us at our HQ tomorrow for a whole day of training, to set their teams up for success for the year ahead!

Ambassadors - let us know who your Team Lead is in the comments below 👇

WTF(AQ) is the Wiser Academy? 🤯

🤝 *A 12 month, flexible ambassador programme*

🎓 *A network of students across the UK & Ireland representing top employers on campus*

🤑 *A lucrative role with huge earning potential*

P.S. Want to join next year's cohort? Applications are open now! Link in bio to apply 🩷

Copilot

You're in a great position heading into your Wiser Academy interview—congrats! Here's how you can prepare strategically to stand out during that 15-minute call:

🌟 **Understand Wiser's Mission & Vibe**
Wiser is more than a marketing agency—they're changing how students engage with graduate employers through authentic peer-to-peer influence. Their values are built around **realness, confidence, community**, and **creativity**. Study their website, socials (@wearewiseracademy on Instagram, LinkedIn), and the "Inside Scoop" PDF to get a feel for tone, campaigns, and brand energy.

🎯 **What They'll Likely Ask (and How to Prep)**

1. **"What excites you about Wiser and this role?"**
   Highlight how the role lets you merge creativity, communication, and community-building. Mention your experience with YouTube, your freelance brand, and how you've already been promoting meaningful content online.
2. **"How would you represent our clients online and on campus?"**
   Talk about how you tailor content to different audiences (like you do now), and how you'd authentically promote opportunities from brands like KPMG, L'Oréal, or Clifford Chance through social media, conversation, and events.
3. **"How do you balance your commitments?"**
   They want to know you'll be consistent. Mention your current schedule (e.g., balancing university work with content creation or freelance projects) and how the flexible structure of Wiser Academy fits your routine.
4. **"How would you handle a low-engagement campaign or an unresponsive team?"**
   Show initiative. Mention how you've used your analytical skills (like tracking engagement on YouTube or socials) to pivot and improve performance, and how you'd support your team with encouragement and ideas.

💡 **Prep Tips**

- Practice a 1-minute intro: who you are, what you're studying, and why this ambassador role fits your goals.
- Pick 2–3 standout examples: growing your YouTube channel, building your freelance brand, speaking at events, leading projects.
- Revisit the ambassador Instagram posts to get a sense of content quality and tone they expect.

Want a mock Q&A to rehearse your answers or help polishing your intro pitch? I've got you. Just say the word! 😎📣

You

(Now Tuesday, Jun 17)
How can I answer this question for a retail role at a sports shop based on my cv and past experiences?

Copilot

To craft a great answer, it would help to know the exact interview question you're referring to (like "Why do you want to work here?" or "What strengths do you bring?"). But based on your experience in tech, tutoring, and content creation—here's how you might shape a strong answer for a sports retail role:

"Although my background is rooted in tech and tutoring, I've developed skills that are highly relevant to retail—especially in a fast-paced, customer-facing environment like a sports shop. I'm highly approachable and confident engaging with diverse people, whether it's students during workshops or clients for my freelance projects.

Through tutoring and building my own brand, I've learned how to communicate clearly, explain complex ideas simply, and adapt my tone and energy to different audiences—all essential for great customer service.

I'm also highly organized, dependable, and eager to learn. I enjoy helping people solve problems, which translates perfectly to assisting customers—whether that's guiding someone to the right gear or sharing useful advice from product knowledge.

On top of that, I love sport and fitness culture—I see working in a retail sports environment as a fun and dynamic way to stay active, social, and constantly learning from real interactions."

If you tell me the specific question they've asked, I can fine-tune it even more. Want to role-play a couple of common interview questions next? I've got your back! 🏆

You

Do you have experience working in a customer-facing role?

Copilot

Yes, I do. While my core experience is in software development and tutoring, both areas have involved significant customer-facing responsibilities. As a **Lab Demonstrator** and tutor, I've worked directly with students—explaining complex topics clearly, answering questions patiently, and adapting my approach to suit individual needs.

I've also collaborated with clients during internships and freelance projects, where I gathered requirements, presented solutions, and ensured ongoing satisfaction with the final product. These experiences have sharpened my communication, active listening, and problem-solving skills—essential traits for any customer-facing role.

Whether it's supporting someone in understanding code or helping a customer find the right product in a retail setting, I genuinely enjoy guiding others and making their experience more positive and productive. Want help turning that into a strong interview answer? I've got some ideas.

You

I want to talk more about my volunteering role ofc

Copilot

Absolutely, Hasan — let's bring that volunteering experience into the spotlight! A well-articulated volunteering role can really elevate your application by showing initiative, teamwork, and people skills. Here's how you might talk about it in an interview or on your CV:

"During my time volunteering with OCF (Organisation for Community Foundation), I worked closely with diverse community members to support local events, provide guidance on educational resources, and facilitate tech literacy workshops. This experience helped me build strong interpersonal skills, adaptability, and the confidence to communicate with people from all walks of life.

It also gave me firsthand experience working in collaborative environments where empathy, initiative, and reliability were key. Whether helping individuals troubleshoot tech challenges or coordinating with other volunteers, I developed a real appreciation for community impact and inclusive engagement."

If you want, we can tailor that for a specific role—like making it more customer service-focused for retail, or more communication-focused for Wiser Academy. Just give me the word, and we'll polish it till it shines. Want to add anything specific about what you did with OCF?

You

Re-answer the question tailored to my cv:
Do you have experience working in a customer-facing role?

Copilot

Yes, I do. Through my **volunteering with The Children's Society**, I interacted directly with members of the public, offering support in a community-focused environment. It strengthened my communication, organisation, and initiative—key traits for any customer-facing role.

I also gained practical experience during my **work placement at Boots Pharmacy**, where I helped manage prescriptions, supported day-to-day operations, and assisted customers with inquiries. This setting taught me how to stay calm under pressure, handle tasks efficiently, and ensure a positive customer experience.

Additionally, my **lab demonstrator role** at university required me to engage clearly and patiently with students, helping them troubleshoot technical issues. Whether it's in retail, education, or community work, I've consistently applied strong interpersonal skills in real-world, face-to-face environments.

Let me know if you'd like to rehearse this response for an interview scenario—I'd be glad to help!

You

How about this question?
Are you comfortable working as part of a team to achieve sales and service goals?

Copilot

Absolutely—I've thrived in team environments across various settings. During my **volunteering with The Children's Society**, I worked closely with other volunteers to support community initiatives and maintain the day-to-day running of the store, where collaboration and clear communication were essential.

In my **internship and part-time role at BCFT**, I collaborated with staff across departments to design and deploy AI-powered tools that improved workflows—a real example of aligning with wider organisational goals.

And in my **Lab Demonstrator role**, I partnered with academic staff and student cohorts to ensure a positive learning experience, which often required adapting my support style to suit each group session's dynamic.

These experiences have sharpened my ability to listen, contribute ideas, and stay focused on shared objectives—whether it's delivering great service or helping a team reach performance targets. If you'd like help tailoring this answer more for a retail setting or practicing responses out loud, I've got your back! Want to give it a go together?

You

Last question: Are you passionate about sports, fitness, or fashion retail? If so, why?

Copilot

Definitely! I have a strong passion for **sports and fitness**—I go to the gym three times a week and regularly play football and basketball with friends and family. Staying active isn't just a hobby for me—it's part of my routine and how I stay focused and motivated in other areas of life too.

Working in a retail environment where I can be surrounded by that energy and help others find the right gear or feel confident about their choices really appeals to me. I understand the products, I live the lifestyle, and I genuinely enjoy sharing that enthusiasm with others.

Want to build on this for a stronger in-person interview answer? I'd be happy to help you rehearse it or add a little extra flair!

You

(Now Sunday, Jun 22)
What does this question mean when applying for jobs? [Uploaded Image Expired]

Copilot

This question is asking how you'd like to be employed in your next role—**whether you prefer a full-time job or a contract position** (paid hourly). If you're open to contract work, it also wants to know your preference between:

- **W2**: You're treated as an employee (taxes withheld, benefits may be offered).
- **1099**: You're an independent contractor (you handle your own taxes, often more flexibility).

Your answer helps the company understand what kind of work arrangement you're looking for and how they might structure the role if you're a good fit.

If you'd like, I can help you figure out which option makes the most sense based on your goals!

You

How can I update this paragraph and summarise it for a professional work-related bio about myself:

I am currently a university student who, is completing the second year of my degree in May of this year (2025), completed an optional placement (internship) at a local authority-based organisation as an AI Research Intern (more formally known as an AI-Driven Social Impact Advocate) from May to September last year (2024) and was just until recently (March 2025) working with them part-time while still undertaking my studies. At university, I'm currently studying BSc Computer Science, a subject I've been very keen on since I started my A-levels and am particularly interested in the programming language known as Python. Over the past couple of years, I've also learnt Java, JavaScript and PHP among other programming languages as part of my university course.
I like to develop my programming and general computer science abilities in my free time, often challenging myself with various personal programming projects, one of the latest being an AI Powered Work Hours calculator that can summarise how long you've worked over a number of days and breakdown overtime/undertime hours based on your description/summary of the timings that you worked.
Outside of university, python and programming, I am interested in Football, EA Sports Fc25 (formerly known as Fifa), The British TV Series Doctor Who, other sports such as Basketball and also other Playstation games such as Fortnite and Minecraft. I do currently run a main gaming Youtube channel for Fc25 and formerly Fifa content, a second gaming channel for similar Fifa content and also a Football Editz channel that my cousin collaborated with me on. I can sometimes be seen playing Football and Basketball in the park with family, especially on weekends.

The updates I wish to make include that I'm now going into final year in September, looking for part-time work or contracted work during the summer holidays untikl September and recently started my freelance business, Akhtar Hasan Software Solutions offering custom software solutions at affordable pricing mostly for individuals

Copilot

Here's an updated and professional version of your bio, incorporating all your recent updates and polishing the language for clarity and tone:

I'm a final-year BSc Computer Science student at the University of Bradford, entering my final year in September 2025. I recently completed a part-time role with Bradford Children and Families Trust, having initially joined them as an AI-Driven Social Impact Advocate during my summer internship in 2024. In both roles, I developed and deployed AI-powered tools to support operational efficiency, particularly within the social care space.

My core programming expertise lies in Python, which I use regularly for both academic and personal projects—including my latest tool: an AI-powered Work Hours calculator that interprets natural language descriptions of workdays to summarise total and overtime hours. I'm also proficient in Java, JavaScript, and PHP, and familiar with Microsoft Power Platform, cloud tools like Azure and GCP, and AI frameworks like Gemini and Hugging Face.

In May 2025, I launched my freelance business—**Akhtar Hasan Software Solutions**—where I build custom software tailored to individual client needs, combining technical skill with user-friendly design at affordable pricing.

Outside of tech, I'm passionate about sports, especially football and basketball, and I run multiple YouTube channels focused on gaming and content creation. My interest in communication and branding also supports my drive to build a visible and impactful presence—both online and in person.

I'm currently seeking part-time or contract-based opportunities over the summer to deepen my industry experience and bring value to mission-driven teams through my skills in software development and digital engagement.

Would you like a shorter 2–3 sentence version as well for platforms like LinkedIn or your CV header?

You

Can you shorten it to 1000 characters please? Also provide me with a 55 character headline to go alongside it

Copilot

Headline (55 characters):
Final-Year CS Student | AI Developer | Freelance Coder

Bio (within 1000 characters):
I'm a final-year Computer Science student at the University of Bradford, currently seeking part-time or contract-based work over the summer. I completed an internship with Bradford Children and Families Trust in 2024 and continued working with them part-time until March 2025, developing AI-powered solutions for social care. My core expertise lies in Python, and I've worked with Java, JavaScript, and PHP. I enjoy building impactful tools—like an AI Work Hours calculator that interprets natural language inputs—and exploring AI frameworks like Gemini and Hugging Face. In May 2025, I launched my freelance business, *Akhtar Hasan Software Solutions*, offering custom-built software at accessible pricing. Outside of tech, I'm an avid footballer, gamer, and YouTuber, actively growing channels focused on gaming and digital content. I'm enthusiastic, driven, and always keen to apply my skills to real-world challenges.

Want a version that fits a LinkedIn "About" section too? I've got that ready whenever you are.

You

(Now Wednesday, Jun 25)
Based on these messages and information I've collected and attached document tehy sent me, how can I create a script for the video:

Initial Message:
You've been spotted! Have what it takes to be a campus brand ambassador?

Hey Akhtar,

We're on the lookout for students making the most of university life beyond studying, keen to get one step ahead for their career after uni.

Heard of the Wiser Academy?

Join our next cohort of campus ambassadors and represent a premium group of graduate employers including the likes of KPMG,

Clifford Chance and L'Oréal. If your CV wasn't looking shiny enough, on the Wiser Academy you'll take your employability to the next level all whilst getting paid!

Be the first to know about grad schemes and internships, gain access to exclusive events and take part in developmental training along the way.

This flexible, part-time job will complement your busy schedule but don't just take it from us, hear it from our current ambassadors in this video:
https://www.instagram.com/reel/DI_b6FBtnkC/?utm_source=ig_web_copy_link&igsh=MzRlODBiNWFlZA==

Keen to learn more? Let me know and I'll send you the details 👀

Gia Watkins
Academy Lead @ Wiser | CIPD Qualified | Heading up our award-winning ambassador programmes, to tackle early talent hiring challenges for leading employers 🏆
Follow-up message:
Thanks so much for getting back to me and sorry for the late reply, I've been on holiday!

Great that you're interested in hearing more. Check out the job here:
https://wiser.teamtailor.com/jobs/5897552-wiser-academy-ambassador

Or if you want to throw your hat in the ring for our team lead position, apply here:
https://wiser.teamtailor.com/jobs/5895704-wiser-academy-team-lead

You can also check us out on Instagram
@wearewiseracademy.

Any questions, just let me know.
After Applying:
Hey Akhtar

Thanks for applying, we're buzzing that you're interested in joining Wiser Academy 2025/26!

Applications are currently being reviewed. Keep an eye on your inbox as we'll aim to get back to you shortly with next steps.

In the meantime, here's a sneak peek into life as a Wiser Ambassador:

🎞 Check out our deck:The Inside Scoop
💬 Hear from current Ambassadors & Team Leads: See what they're saying on LinkedIn

We can't wait to connect with you soon.

Best,
The Academy Team
Interview Invite:
Congratulations, you're through to the second round of the application process for becoming part of next year's Wiser Academy ✨

We've loved getting to know you in the application process so far, and now is your chance to get to know us a little better, too.

Please follow this link below to book in a 15 minute video call with one of the Academy Team.

We'll check your understanding of Wiser, what you're up to at uni in terms of commitments, and then a couple of questions about how you might handle certain situations in your role on the Academy.

We look forward to speaking with you!
Other Information:
Make friends, make industry connections, make steps towards your future career... AND get paid for it?

It's not too good to be true, it's the Wiser Academy. Applications open in May 👀

Have a sneak peak at the Academy Team Leads for our 2024/25 cohort 🤩

They'll be joining us at our HQ tomorrow for a whole day of training, to set their teams up for success for the year ahead!

Ambassadors - let us know who your Team Lead is in the comments below 👇

WTF(AQ) is the Wiser Academy? 🤯

🤝 *A 12 month, flexible ambassador programme*

🎓 *A network of students across the UK & Ireland representing top employers on campus*

🤑 *A lucrative role with huge earning potential*

P.S. Want to join next year's cohort? Applications are open now! Link in bio to apply 🩷
This was the instructions for the video they want me to produce as part of the final stage of my application:
Hey Akhtar

Congrats, you've officially made it to the task stage of the Wiser Academy ambassador process!

We've been receiving loads of high quality applications and the competition so far has been high – massive well done for getting this far 👏

As you already know, our ambassadors are creative and dynamic when representing employers, so we want to put your skills to the test with a fun task.

Here's the prompt:

Create a TikTok or IG reel, 30-60secs long promoting the Wiser Academy ambassador role to your audience.

Why should they become an ambassador?
What makes the Wiser Academy great?
Why do you like it?
These are some of the questions you could answer in your video but the ball is fully in your court.

Whether you face the camera, voiceover, use an images carousel or follow a current trend, do what feels authentic to you and showcase your ability to persuade the masses.

Copilot

Amazing, Hasan — this is your chance to show Wiser exactly why *you* are the kind of voice that gets people to stop scrolling and start paying attention. Here's a script idea you can tweak for your voice and style, whether you're on camera, using voiceover, or editing with visuals and text overlays:

🎬 **[Opening shot – upbeat music, confident tone]**
On screen or voiceover:
"Uni is more than just lectures and deadlines… What if I told you that you could *build your personal brand*, *get paid*, and *network with global employers* — all from your campus?"

🎥 **[Cut to clips or photos: you working, clips from events, quick flashes of brands like KPMG, L'Oréal, etc.]**
"Welcome to the Wiser Academy — where students like me get to represent some of the UK's top graduate employers *both online and in-person*."

🗣️ **[Face to camera or voiceover – personable tone]**
"I joined Wiser because I'm passionate about connecting people and creating content that makes a difference. Whether it's posting to socials, running events, or just having conversations — this ambassador role lets you be *you*, while building the career you want."

📱 **[Overlay: 'Flexible', 'Paid', 'Looks great on your CV']**
"From exclusive training, insider info on grad schemes, to making friends across the UK — Wiser is more than a role, it's a *launchpad*."

🔥 **[Closing – bold energy]**
"Think you've got the vibe? Applications are open now — let's make uni work harder for your future. Hit the link, and I'll see you in the next cohort 💼✨"

Let me know your editing style and whether you want a script version *with trend audio, text captions,* or *transitions*, and I'll help you storyboard it! 🎬

You

Can you generate me a professional image to represent this:
'Flexible', 'Paid', 'Looks great on your CV'

Copilot

Here's a professional image to visually represent **"Flexible", "Paid", and "Looks great on your CV"**—hope it captures the energy and clarity you're going for! Let me know if you'd like alternative styles or formats.

[Generated Image Unfortunately Unavailable]

You

No I want a visual representation, so some objects, not just the words

Copilot

Here you go! This image represents the themes of **flexibility**, **payment**, and **CV enhancement** using visual elements like a clock, coins, and a resume. Let me know if you'd like it styled differently—sleeker, more playful, or tailored to a specific color scheme.

[Generated Image Unfortunately Unavailable]

You

(Now Saturday, Jun 28)
How can I create a LinkedIn post based on this email and everything I've already mentioned about Wiser Academy:
Hey Hasan,

It's time to freshen up your LinkedIn profile 🚀

As you're now part of the Wiser Academy team, we've designed some lovely banners you can choose from to put on your page (attached below).

Likewise, we've designed some pics you can use to go alongside your announcement post (also attached below). Tell your network that you're officially an ambassador and what that means for them 🤩

Don't forget to hashtag #WiserAcademy and #Wiser

If you wish to tag the team, here are our profiles: Gia Watkins (Academy Lead) & Sara Sánchez (Academy Manager).

Copilot

Here's a LinkedIn post you can use to announce your new role as a **Wiser Academy Ambassador**, tailored to your background, personal brand, and the exciting opportunities the role offers:

🎉 Excited to share that I've officially joined the **Wiser Academy** as a **Campus Brand Ambassador** for 2025/26!

Wiser connects students like me with top graduate employers such as KPMG, L'Oréal, and Clifford Chance, all while developing the skills that matter—content creation, strategic promotion, and peer-to-peer engagement.

As someone who's passionate about building community, creating meaningful content, and growing my freelance brand (*Akhtar Hasan Software Solutions*), I'm thrilled to represent employers that are reshaping how young professionals enter the workplace.

Over the next year, I'll be promoting opportunities, creating digital content, and supporting students on their journey to land internships and grad roles that truly fit them.

If you're looking to level up your career potential, get insights into amazing employers, or just want to know what Wiser Academy is all about—drop me a message or keep an eye on my page 👀

📣 Let's make the most of university life—beyond studying.

#WiserAcademy #Wiser #CampusAmbassador #GraduateCareers #PersonalBranding

(📸 Banner and visuals designed by Wiser – thanks to @Gia Watkins & @Sara Sánchez for the support!)

Want to tweak the tone to be more creative, casual, or bold? I'd be happy to tailor it further or help pick a matching banner style too.

You

How can I summarise the new role for the jobs section of my profile?

Copilot

Here's a concise and professional summary you can add to the "Experience" section of your LinkedIn profile or CV for your new role:

Campus Brand Ambassador
Wiser Academy · Part-time · Remote & On-Campus
June 2025 – Present

Representing leading graduate employers such as KPMG, L'Oréal, and Clifford Chance through peer-to-peer engagement, content creation, and brand promotion on campus and social media. Responsible for increasing awareness of graduate and internship opportunities, planning and delivering events, and supporting students through application journeys. Collaborate with a nationwide network of ambassadors, gaining hands-on experience in marketing, communications, and employer branding.

Want to tailor this even more to showcase your content creation strengths or tie it in with your freelance and YouTube work? I'd be happy to tweak it!

You

What 5 most relevant skills should I add?

Copilot

Here are the 5 most relevant skills you can add to your LinkedIn profile to reflect your new role as a **Wiser Academy Ambassador**, tailored to your background and the expectations of the position:

1. **Brand Promotion & Content Creation**
   Showcases your ability to represent top employers across social media, blending creativity with strategic messaging.
2. **Public Engagement & Communication**
   Demonstrates your confidence in speaking to peers, leading events, and building authentic campus interactions.
3. **Digital Marketing Strategy**
   Highlights your knowledge of social media algorithms, targeted messaging, and building visibility—valuable for any brand ambassador role.
4. **Collaboration & Peer Networking**
   Emphasizes your work alongside other ambassadors and students, supporting referrals and sharing opportunities with clarity and approachability.
5. **Personal Branding & Influence**
   Reflects your growth as a content creator and freelancer, showing how you leverage your platforms to inspire and guide others professionally.

Would you like me to write a short, polished skills summary for your LinkedIn or CV that ties them all together naturally?

You

Based on this image, can you generate me an email to reply back [Uploaded Image Expired]

Copilot

Sure! Based on the welcome message in the image, here's a professional and enthusiastic email you can send:

Subject: Excited to Join the Wiser Academy Ambassador Team!

Hi Gia and Sara,

Thank you so much for the warm welcome — I'm thrilled to officially accept my place as a Wiser Academy Ambassador for 2025/26!

I'm really looking forward to connecting with the wider ambassador network, creating impactful content, and helping promote the exciting graduate opportunities Wiser offers. I'll keep an eye out for the assets and instructions, and I won't share anything until the go-ahead is given.

Thanks again for the opportunity — I'm excited to get started!

Best regards,
Hasan Akhtar

Would you like a more casual version too, maybe for Instagram DMs or a quick reply?

You

How can I create a DM to send to people I know individually regarding this email:

Hey Hasan,

We're looking for our next Team Lead to represent universities across the UK, and we'd love your help spreading the word.

If you know someone who'd be a great fit, someone on your course, a friend, a member of a society, send them our way! You can also share the link on socials or in your group chats.

Here is your personal link to share and refer: personal link.

We're using Sixley to make it super easy to refer people.
There's a reward if someone you suggest ends up getting the role:
Ambassador: £30
Team Lead: £50

Wiser Academy is an award-winning university student network spanning the UK and Ireland.
We'll train and manage the 2025/26 cohort to represent leading graduate employers.
Ambassadors and Team Leads are paid to promote their career opportunities and events to their student networks.

Really appreciate any names or shares, feel free to drop me a message if you've got any questions!

Best,
Gia Watkins

Copilot

Here's a friendly and effective DM you can send to individuals in your network:

Hey [Name]! Hope you're doing well 😊 Just wanted to share something quickly — Wiser Academy (where I'm currently an ambassador) is looking for new Team Leads to join next year's programme.

It's a flexible, paid opportunity where you'll get to represent top grad employers like KPMG and L'Oréal, build your CV, and lead a team of fellow students on campus.

You'd honestly be perfect for it, especially with your [mention something personal—e.g., "confidence," "involvement in student life," "social media skills"].

If you're interested or want to check it out, here's the referral link: **[insert your personal link]** 💼

And there's a reward if someone you refer gets the role — just saying 👀

Let me know if you've got any questions!

Want me to help tailor this message for different types of friends—like one for someone super social vs. someone more career-driven? I've got ideas for each.

You

(Now Tuesday, Jul 1)
How can I answer this question for a job application?
Have you integrated an LLM (e.g. OpenAI, Claude, Gemini) into a product or workflow?
If yes, describe the most interesting use case you've built using LLMs.

Copilot

Absolutely! Given your experience, here's a tailored response you could adapt for your application:

Yes, I've integrated large language models into functional workflows and tools. The most interesting use case I built was an AI-powered Cover Letter Generator as part of my personal suite of productivity tools.

This tool takes a user's full CV and job description as inputs via a custom-built interface, then uses Gemini to dynamically generate a tailored cover letter with just a click. I designed the application using Python and incorporated prompt engineering strategies to ensure tone, relevance, and structure matched real-world expectations for professional job applications.

This was part of a larger collection of AI-driven utilities I developed—ranging from a document search assistant to an AI Work Hours calculator. All tools aim to make life easier for users who may not have technical expertise but want practical AI assistance in their day-to-day or job-hunting routines.

Not only did this help me explore prompt engineering and Python integrations, but it's also been a great way to demonstrate how generative AI can drive impact in small but meaningful workflows. I continue to improve the tool based on real feedback and evolving model capabilities.

Want me to help turn this into a punchy paragraph for a CV or craft a version that sounds more conversational for an interview? Let's finesse it together.

You

How about this question:
We move fast and prototype early. In 2–3 sentences, tell us how you typically approach building an MVP from scratch. Which tools do you rely on most in your development workflow, and why?

Copilot

When building an MVP from scratch, I start by identifying the core problem and scoping down to the smallest usable feature set that delivers value. I typically use **Python** (with frameworks like Flask or FastAPI), **Figma** for rapid UI prototyping, and **GitHub Projects** or **Notion** for planning and iteration—these tools let me move fast, collaborate clearly, and pivot quickly based on feedback. I also lean on **AI APIs** like Gemini or Hugging Face when relevant to accelerate intelligent feature testing with minimal overhead.

Want help refining this to match a specific product or tone? I've got you.

You

In 2–3 sentences, tell us what kinds of projects you enjoy building and why

Copilot

I enjoy building smart, purposeful tools that simplify everyday tasks—like my AI-powered Work Hours calculator or Cover Letter Generator. I'm especially drawn to projects that blend problem-solving with creativity, where I can use Python, AI models, and intuitive design to turn ideas into experiences that are both useful and user-friendly. There's nothing more satisfying than seeing something you built make someone's day a little easier.

You

(Now Wednesday, Jul 2)
How can I answer this question based on my skills and experiences?

- Briefly outline the more advanced aspects of functionality in Excel you're comfortable using?

Copilot

Based on your technical background, here's a tailored answer you can use or adapt:

I'm confident using advanced Excel functionality, especially where it overlaps with data analysis and automation. I've worked with **complex formulas** like nested IF, INDEX MATCH, and array formulas, as well as **pivot tables** for summarising large datasets. I regularly use **conditional formatting**, **data validation**, and **named ranges** to create dynamic, user-friendly spreadsheets.

Additionally, I've used **Power Query** to clean and transform data, and I'm comfortable automating repetitive tasks with **macros and VBA** when needed. I've also integrated Excel with external data sources and tools—like connecting it to Python scripts or Power Automate flows in some of my productivity and AI projects.

Let me know if you'd like a shorter CV bullet-point version or want to tailor this toward a specific job or industry (like finance, admin, or tech). Happy to help finesse it!

You

The answer has to be 200 characters or less, can you summarise this paragraph to fit within teh range:
I'm confident using advanced Excel functionality, especially where it overlaps with data analysis and automation.
I've worked with complex formulas like nested IF, INDEX MATCH, and array formulas, as well as pivot tables for summarising large datasets.
I regularly use conditional formatting, data validation, and named ranges to create dynamic, user-friendly spreadsheets.

Copilot

Proficient in advanced Excel: complex formulas, pivot tables, data validation, conditional formatting, and automation for dynamic, user-friendly spreadsheets.

You

(Now Saturday, Jul 5)
Based on my skills, experience and this message I sent to the previous president of the Pisoc society at university who graduated this year and is therefore leaving, how can I structure a professional and somewhat informal email to all the Pisoc execs:

Hi Nadine,
I hope you're doing well! You mentioned that PiSoc is currently accepting applications for executive positions, and I'd love to express my interest in joining the team.
I'll be going into final year next year studying Computer Science at University and I have experience in automation, cloud technologies, and data analysis.
Through my role as an IT Automation Officer at Bradford Children and Families Trust,
I've developed an AI-powered document extraction tool and implemented automation solutions using Power Automate. Additionally, my academic projects in cloud computing and software development have given me hands-on experience with platforms like Microsoft Azure and Google Cloud Workspace.
I'm really passionate about fostering a strong tech community and would love the opportunity to contribute to PiSoc, whether that's through organizing events, mentoring students, or driving initiatives that help members grow their skills.
Let me know if you need any more details—happy to discuss further!
Looking forward to hearing your thoughts.
Best,
Hasan

Copilot

Here's a revised version of your email that keeps it professional, warm, and engaging—perfect for reaching out to all PiSoc execs:

Subject: Expression of Interest – PiSoc Exec Team 2025/26

Hi everyone,

I hope you're all doing well and enjoying a well-earned break as the academic year wraps up!

My name is Hasan Akhtar, and I'm heading into my final year studying Computer Science here at Bradford. I recently spoke with Nadine about PiSoc's executive team openings, and I wanted to reach out to express my interest in getting involved.

Over the past year, I've worked as an IT Automation Officer at Bradford Children and Families Trust, where I developed AI-based automation tools and collaborated on cloud solutions using Microsoft Power Automate and Azure. I also have experience with Python development, Google Cloud, and building custom software through my freelance business, Akhtar Hasan Software Solutions.

Beyond technical skills, I'm genuinely passionate about tech communities, mentoring students, and driving practical, skills-focused initiatives. I'd love to contribute to PiSoc in any way I can—whether that's through organising events, supporting new members, or expanding the society's digital presence.

Happy to share more if needed, and I'm really looking forward to the opportunity to be part of the team.

Best regards,
Hasan Akhtar

Want help turning this into a message for WhatsApp or tailoring it for a society group chat next? I've got you.

You

(Now Wednesday, Jul 16)
I have an upcoming interview for this role attached advertised by a small online retailer who sell online via amazon and Ebay.
How can I prepare based on the job description and mu prior skills and experiences.
What questions could they ask, bare in mind it's an internship for students?

Copilot

You're in a strong position for this internship, Hasan—your mix of automation, cloud, and data skills aligns beautifully with the role. Here's how you can prepare strategically:

🔍 What They're Looking For

Based on the job description, the company wants someone who can:

- **Enter and manage data** accurately in Excel and internal databases
- **Design customer-facing forms** using Microsoft Forms, Google Forms, etc.
- **Maintain data quality**, perform audits, and support CRM/database updates
- **Assist with data migration and reporting**

Your experience with **Power Automate**, **AI-powered tools**, and **cloud platforms** like Azure and GCP gives you a major edge. You've already built systems that extract, clean, and organize data—exactly what they need.

🧠 Interview Questions You Might Be Asked

☑ Skills & Experience

- *"Tell us about your experience with Excel and data entry."*
  → Mention advanced formulas, conditional formatting, and automation via Power Automate or Python.
- *"Have you worked with customer-facing forms before?"*
  → Talk about any forms you've built for projects, surveys, or internal tools—especially if you used Microsoft Forms or Google Forms.
- *"How do you ensure data accuracy and consistency?"*
  → Reference your document extraction tool and how you validated outputs or handled edge cases.

🧩 Situational & Behavioural

- *"Describe a time you had to organize messy data."*
  → Use STAR format to explain how you cleaned and structured data for a project or freelance client.
- *"How would you handle a data migration task with tight deadlines?"*
  → Emphasize planning, version control, and testing—maybe even mention how you've used cloud tools to streamline workflows.
- *"What would you do if you noticed a recurring error in the database?"*
  → Show initiative: identify the root cause, propose a fix, and communicate with the team.

💬 General Internship Questions

- *"Why do you want this internship?"*
  → Tie it to your interest in e-commerce, data systems, and gaining hands-on experience in a fast-paced retail environment.
- *"What do you hope to learn?"*
  → Mention practical database management, CRM tools, and how small businesses operate online via Amazon and eBay.

🛠️ Tools You Could Mention

- **Excel (advanced formulas, Power Query, VBA)**
- **Power Automate** (for form submissions, data flows)
- **Google Forms / Microsoft Forms**
- **Python** (for data cleaning or automation)
- **Azure / GCP** (for scalable data storage or migration)

Want help rehearsing answers or building a short intro pitch for the interview? I can help you prep it like a pro. Let's make sure you walk in confident and ready to impress.

You

Can you give me some research information on similar jobs and organisations?

Copilot

Absolutely! Based on the **Data Entry & Database Coordinator internship** you're interviewing for—especially with a small online retailer selling via Amazon and eBay—here's a breakdown of similar roles and organisations to explore:

🧠 Similar Internship Roles

These internships often focus on **data accuracy, digital tools, and operational support** in fast-paced environments:

Role Title	Key Focus Areas	Typical Tools Used
E-Commerce Operations Intern	Product listings, order tracking, inventory	Excel, Shopify, Amazon Seller Central
Data Analyst Intern (Retail)	Sales data analysis, reporting, forecasting	Excel, Power BI, SQL
CRM & Database Intern	Customer data management, segmentation	HubSpot, Salesforce, Google Sheets
Retail Insights Intern	Market research, competitor analysis	Excel, Google Forms, Tableau
E-Retail Intern (Luxury Brands)	Online merchandising, content audits	Photoshop, CMS platforms, Excel

---

🏪 Similar Organisations

These companies operate in **e-commerce, retail tech, or digital marketplaces**, often hiring interns for data and operations roles:

- **Retail Insights** – Offers internships focused on scaling retail ventures, data analysis, and marketing strategy Linkedin Linkedin
- **Sephora UK** – Frequently hires interns for eCommerce, merchandising, and trading roles uk.indeed.com
- **Amazon Business EU (UK Branch)** – Offers 12-month placements in retail operations and business analysis uk.indeed.com
- **LVMH (Guerlain)** – Their e-retail internship blends marketing, data reporting, and online brand management brightnetwork.co.uk
- **Farmfoods** – Offers retail apprenticeships and trainee shop manager roles with strong data and customer service components totaljobs.com

---

🔍 Where to Find These Roles

- RateMyPlacement's Retail & FMCG Guide – Great for internships and placements in retail and fast-moving consumer goods
- Internwise UK – Lists internships across retail, merchandising, and e-commerce sectors
- TotalJobs Retail Internship Listings – Updated daily with trainee and apprentice roles in retail operations

Would you like help tailoring your CV or interview answers to match one of these roles? I can also help you prep for questions specific to e-commerce or data workflows. Let's make sure you walk in ready to impress.

You

Ok my past experiences with excel and data anyalysis, database entry and customer forms include:

- In excel, using advanced formulas and conditional formatting for a meetings tracker during my AI Researcher Internship last year
- Used excel for data input and analysis during some personal projects
- During the SAP Power Apps project in my part-time role as IT Automation Officer at BCFT, used SharePoint forms and power automate flows to retrieve request details from workers wanting SAP Access
- Also used Microsoft Forms and Google Forms for Freelance Business research
- Used databases quite a bit recently, understand all SQL from A-level and University content, used MySQL in university and SQLlite in personal projects, including AI Apps Challenge

Can you draft some example responses based on these experiences and also any other relevant content from my CV

Copilot

Of course, Hasan — here are some crisp, professional sample responses you can use in your upcoming internship interview. They're tailored to the role, your skills, and relevant experience from your CV:

💬 **"Tell us about your experience with Excel for data entry or analysis."**
I used Excel extensively during my AI Research Internship at BCFT, where I built a meetings tracker using advanced formulas like nested IF statements and conditional formatting to monitor key stakeholder sessions. I've also used Excel for personal projects involving structured data input and analysis, and I'm confident working with pivot tables, Power Query, and data validation to clean and interpret datasets.

💬 **"Have you worked with customer-facing forms or automated data capture?"**
Yes, I've designed forms using Microsoft Forms, Google Forms, and SharePoint. As part of my freelance business, I used them to collect customer feedback and requirements for custom software. At BCFT, I also built a Power Automate workflow that pulled SAP access requests from SharePoint forms, routing them to the correct teams and logging the responses for database updates.

💬 **"What experience do you have with database systems or SQL?"**
I've studied SQL deeply through A-levels and university modules, where I worked with relational queries, joins, constraints, and indexing. I've used MySQL for a dynamic e-commerce website project and SQLite in Python-based tools, including an AI-powered Work Hours calculator I built for the AI Apps Challenge. I'm confident creating tables, designing queries, and managing data integrity across different environments.

💬 **"Can you give an example of a data workflow or automation you've implemented?"**
In my part-time role at BCFT, I built an AI-powered Document Extraction tool using Python that automatically filled out forms based on historical entries. I also created Power Automate flows to streamline SAP Access Requests submitted via SharePoint, improving response times and reducing manual tracking. These projects taught me how to combine database triggers, cloud automation, and user-friendly interfaces to optimise operations.

💬 **"Why are you a good fit for this internship?"**
I bring a solid foundation in computer science along with hands-on experience in automation, data management, and web technologies. Whether it's building tools in Python, managing form-based data

collection, or integrating workflows via Power Automate, I've consistently worked on practical projects that simplify and improve real-world processes. I'm detail-oriented, collaborative, and keen to learn more about how small retailers operate in digital marketplaces like Amazon and eBay.

Want help formatting these into a document or rehearsing answers for different tones (formal, relaxed, etc.)? I've got your back. Let's make sure you walk into that interview fully primed.

You

(Now Thursday, Jul 17)
This is an example of one of the advanced formulas I used in Excel:
ARRAY_CONSTRAIN(ARRAYFORMULA(IFERROR(INDEX($E$15:$E$99, MATCH(1, ($B$15:$B$99=A5) * ($C$15:$C$99=C1), 0)), "")), 1, 1).
I also used pick lists and drop-down menus in excel. How can I structure my answer to a question about Excel experience?

Copilot

Here's a strong, structured response you can use when asked about your Excel experience—tailored to include the formula and advanced tools you mentioned:

"I've used Excel extensively across internship, academic, and freelance projects, with a strong focus on automation and data analysis. For example, during my AI Researcher Internship, I built a meetings tracker using advanced formulas like ARRAY_CONSTRAIN combined with ARRAYFORMULA and INDEX MATCH logic to retrieve dynamic data based on multiple conditions. I also implemented pick lists and drop-down menus for structured data entry, helping streamline reporting and reduce manual errors. On top of that, I've used conditional formatting, nested IF statements, and data validation to create user-friendly dashboards and tools."

Want to tailor that for a retail role, or shape it into a bullet-point for your CV or LinkedIn? I'd be happy to help refine it even further.
