**You**

I'm creating a SharePoint tutorial for all different members of my organisation to follow. How can I use my notes to explain the concept and importance of pages in my tutorial to write a script for my video, the tone should be professional and somewhat friendly.
Notes:

- Similar to a webpage, have landing page and subpages, some of which can be accessed through the navigation bar, very similar concept
- Allows to make managed webpage that links to documents in site and can incorporate Microsoft widgets in
- Great way to communicate ideas and information to your team
- Great way to share ideas using images, Excel, Word and PowerPoint documents, video and more
- Can create and publish pages quickly and easily, and look great on any device

**Copilot**

Absolutely, I'd love to help with that. Here's a draft script for your SharePoint tutorial video. Remember to keep it dynamic and engaging:

---

**[Intro]**
*Hi everyone, welcome to our SharePoint tutorial. Today, we're going to dive into the concept and importance of SharePoint pages within our organization. Let's get started!*
**[Section 1: What Are SharePoint Pages?]**
*Firstly, think of a SharePoint page as similar to a webpage. Just like on a regular website, SharePoint allows us to have a landing page and subpages. Some of these subpages can be accessed through the navigation bar, making it a very intuitive and familiar concept.*
**[Section 2: The Benefits of Using SharePoint Pages]**
*SharePoint pages are not just about organizing information. They allow us to create managed webpages that can link to documents within our site and integrate seamlessly with Microsoft widgets. This means we can bring in calendars, lists, task trackers, and more, right into our pages.*
*Furthermore, SharePoint pages are a fantastic way to communicate ideas and information to your team. They offer the ability to share content using images, Excel, Word and PowerPoint documents, videos, and more, making them incredibly versatile.*
**[Section 3: Ease of Creation and Accessibility]**
*One of the best features of SharePoint pages is how quickly and easily we can create and publish them. No need for advanced technical skills—just a few clicks, and we're set. And the best part? They look great on any device, whether it's a computer, tablet, or smartphone.*
**[Closing]**
*In summary, SharePoint pages are powerful tools that help us manage and share information efficiently. They keep our teams informed, engaged, and connected. So, let's make the most of this incredible resource!*
*Thanks for watching, and don't forget to check out our other SharePoint tutorials. Happy sharing!*

---

Feel free to tweak and adjust the script to better suit your style and specific needs. How does that look for your tutorial?

**You**

(Now Friday, Feb 7)
How about for SharePoint lists?
These are my notes, feel free to add extra information that's relevant:

- A list is a collection of data, similar to an Excel Spreadsheet that you can share with your team members and people who you've provided access to.
- It can be added to the navigation panel of the SharePoint site and can be especially useful for processes like the Spend Efficiency Panel

- The most common advantage is that they are rich and flexible and have many built-in features that provide a robust way to store, share, and work with data.
- You can create forms directly from the SharePoint list and when someone submits the form, it automatically populates the list

**Copilot**

Sure thing! Here's a script for your SharePoint lists tutorial video:

---

**[Intro]**
*Hi everyone, welcome to our SharePoint tutorial. Today, we're going to explore the concept and importance of SharePoint lists within our organization. Let's get started!*
**[Section 1: What Are SharePoint Lists?]**
*Firstly, think of a SharePoint list as similar to an Excel Spreadsheet. A list is a collection of data that you can share with your team members and people who have access to it. This makes collaboration and data management a breeze.*
**[Section 2: Adding Lists to the Navigation Panel]**
*You can easily add lists to the navigation panel of your SharePoint site. This feature is particularly useful for processes like the Spend Efficiency Panel, where quick and easy access to data is crucial.*
**[Section 3: Advantages of SharePoint Lists]**
*SharePoint lists offer several advantages. They are rich and flexible, with many built-in features that provide a robust way to store, share, and work with data. You can create forms directly from the SharePoint list, and when someone submits a form, it automatically populates the list. This ensures that your data is always up-to-date and accessible.*
*Additionally, SharePoint lists can integrate with other Microsoft tools, allowing you to create automated workflows, set up alerts, and more. This makes managing your data even more efficient and effective.*
**[Closing]**
*In summary, SharePoint lists are powerful tools that help us manage and share data efficiently. They keep our teams informed, engaged, and connected. So, let's make the most of this incredible resource!*
*Thanks for watching, and don't forget to check out our other SharePoint tutorials. Happy listing!*

---

Feel free to tweak and adjust the script to better suit your style and specific needs. How does that look for your tutorial?

These are my notes for a News/Discussion Boards section for the tutorials, how can I use this same structure to write one for Shared Calendars?

- Introduction
    - Briefly state the purpose of the tutorial: "Today, we're exploring News and Discussion Boards in SharePoint."
- News Section
    - What Is SharePoint News? - Explain the concept and benefits of using News in SharePoint to keep everyone informed.
        - Creating News Posts
        - Demonstrate how to create a new News post:
          - Navigate to the home page or News web part.
          - Click on "Add" or "New" and select "News post."
          - Choose a template and start adding content.
        - Publishing and Sharing News
            - Show how to publish the news post: - Add a title, text, images, and other web parts. - Click "Post" to publish.
                - Explain how to share News posts with the team:
                    - Use the "Share" button.
                        - Discuss other sharing options, like email and Teams.
        - Checklist:
            - Create a new News post.
            - Add content to the News post.

        - Publish and share the News post.
    - Managing News
        - Show how to edit or delete News posts: - Navigate to the post. - Click on "Edit" or the ellipsis (three dots) and select "Delete."
- Discussion Boards Section
    - What Are Discussion Boards? - Define Discussion Boards and explain their importance for collaboration.
        - Creating Discussion Boards
            - Demonstrate how to create a new Discussion Board: - Navigate to the site contents.
                - Click on "New" and select "App."
                    - Choose "Discussion Board" and name it.
        - Posting and Replying to Discussions
            - Show how to post a new discussion: - Go to the Discussion Board. - Click on "New discussion." - Add a subject and body, then click "Save."
                - Explain how to reply to discussions:
                    - Open a discussion.
                        - Click on "Reply," add your response, and click "Save."
        - Managing Discussions
            - Discuss how to manage and moderate discussions: - Edit or delete discussions. - Use settings to manage permissions and notifications.
        - Checklist:
            - Create a new Discussion Board.
            - Post a new discussion.
            - Reply to a discussion.
            - Manage and moderate discussions.
- Conclusion
    - Recap the key points covered in the tutorial. Provide additional resources for further learning.

**Copilot**

Of course! Here's a structured script for a tutorial on Shared Calendars using the same format as your News/Discussion Boards section:

---

**[Introduction]**
*Hi everyone, welcome to our SharePoint tutorial. Today, we're exploring Shared Calendars in SharePoint. Let's dive in!*
**[Shared Calendars Section]**
*What Is a Shared Calendar?*
*Shared Calendars in SharePoint are a fantastic way to coordinate schedules, manage events, and ensure that everyone in your team is on the same page. They function similarly to Outlook calendars but are accessible to your entire team.*
*Creating a Shared Calendar*
*Demonstrate how to create a new Shared Calendar:*

- Navigate to the site contents.
- Click on "New" and select "App."
- Choose "Calendar" and name it.
- Once created, you'll be taken to the calendar page where you can start adding events.

*Adding and Managing Events*
*Show how to add a new event:*

- Go to the Shared Calendar.
- Click on "New event."
- Add details like title, location, time, and description.
- Click "Save" to add the event to the calendar.

*Explain how to manage events:*

- To edit an event, navigate to the event, click on it, and select "Edit."
- Make your changes and click "Save."
- To delete an event, navigate to the event, click on it, and select "Delete."

*Sharing and Accessing the Shared Calendar*

*Explain how to share the Shared Calendar with the team:*

- Use the "Share" button to provide access to your team members.
- Discuss other sharing options, such as embedding the calendar in a SharePoint page or sharing via email.

*Using Calendar Views and Filters*

*Show how to use different calendar views and filters:*

- Navigate through various views like day, week, and month.
- Use filters to view specific events or categories.

*Checklist:*

- Create a new Shared Calendar.
- Add events to the Shared Calendar.
- Edit and delete events.
- Share the Shared Calendar with the team.
- Use different views and filters.

**[Conclusion]**

*In summary, Shared Calendars in SharePoint are an excellent tool for managing team schedules and events efficiently. They keep everyone informed and organized. Thanks for watching, and don't forget to check out our other SharePoint tutorials. Happy scheduling!*

---

Feel free to tweak and adjust the script to better suit your style and specific needs. How does that look for your tutorial?
