How can I delete photos stored in iCloud on my iPhone?

Copilot

To delete photos stored in iCloud on your iPhone, follow these steps:

1. **Open the Photos app** on your iPhone.[1]
2. **Select the photo(s)** you want to delete.[1]
3. **Tap the Trash button** (it looks like a trash can) and then tap **Delete Photo**.[1]
4. **Go to the Recently Deleted album** (you can find it under Utilities when you swipe up in the Photos app).[1]
5. **Select the photo(s)** you want to permanently delete and tap **Delete**.[1]

If you use iCloud Photos, deleting photos from your iPhone will also remove them from iCloud and any other devices connected to the same Apple account.[2]

I want to delete them from iCloud but not my phone

Copilot

Got it! To delete photos from iCloud without removing them from your iPhone, you can follow these steps:

1. **Turn off iCloud Photos**: Go to **Settings** > **[Your Name]** > **iCloud** > **Photos**, then toggle off **iCloud Photos**.[1] This will download full-resolution versions of your photos to your iPhone.[1]
2. **Delete Photos from iPhone**: Open the **Photos** app, select the photos you want to delete, and tap the trash can icon.[2]
3. **Permanently Delete from Recently Deleted**: Go to the **Recently Deleted** album, select the photos, and tap **Delete**.[3]

By doing this, the photos will remain in iCloud but will be removed from your iPhone.[1]

Not from my phone but from iCloud to free up storage

Copilot

Got it! To delete photos from iCloud to free up storage without affecting your iPhone, follow these steps:

1. **Open Settings** on your iPhone.[1]
2. Tap your **Apple ID** at the top, then tap **iCloud**.[1]
3. Tap **Manage Storage**.[1]
4. Under **Photos**, tap **Edit**.[1]
5. Select the photos you want to delete and tap **Delete**.[1]

This will remove the selected photos from iCloud, freeing up storage space.[1]
