You

Based on this job description and my CV skills, what skills should I highlight for this job application?
Job description:
Role Outline & Organisation Details

- *LCC and the NHS are the largest employers in Leeds.*
- *We have a set of core values which guides us in all we do:*
- *Being open, honest and trusted*
- *Treating people fairly*
- *Spending money wisely*
- *Working as a team for Leeds*
- *Working with all communities*
- *We're on a technical transformation journey where we are evolving across the organisations. This includes modernising our technical stack, creation of the Office of Data Analytics, becoming multi-cloud and implementing automation where possible.*
- *We are passionate about Equality Diversity and Inclusion. We are currently working on a major project around Digital Inclusion across the city.*
- *We work flexi time and you will receive 24 days paid holiday each year in addition to bank holidays.*

What you will do:

- *Work closely with the Cloud & Platform team*
- *Be part of a project migrating on prem services to the cloud.*
- *Setup, maintain, monitor and decommission cloud environments within Amazon Web Services (AWS) and Microsoft Azure.*
- *Troubleshoot and fix any issues affecting performance, availability and accessibility.*
- *Play a vital role in maintaining services for services and the citizens of Leeds*

What induction and ongoing training will be provided?
Induction and training will be provided in a number of different methods including but not limited to:

- *Full induction into the team and Leeds City Council or NHS.*
- *Regular catchups with direct line manager via 121s or similar.*
- *Mentoring by either the former existing student placement or other team member.*
- *On the job training.*
- *Access to custom in house training materials.*
- *Access to online training materials via 3rd parties e.g. LinkedIn learning or Udemy*

Skills required (essential/desirable):
Skills required for the role fall into two areas
Professional Skills

- *Eager to learn new skills.*
- *Communicates clearly with integrity and enthusiasm.*
- *Respects the needs, responses and opinions of others.*
- *Coding is a team sport so you must work well in a team and form effective partnerships and relationships with people both internally and externally, from a range of diverse backgrounds, sharing information, resources and support.*
- *Willing to take on responsibility and put yourself forward.*

Technical Skills
Do not worry if you only have limited knowledge or experience in these areas. Passion and enthusiasm can go a long way.

- *Awareness or familiarity of cloud concepts such as IaaS, PaaS, SaaS, etc.*
- *Awareness of any cloud platform such as AWS or Azure.*
- *Awareness or familiarity of any scripting languages such as Powershell.*

My CV Skills:

- Technical Research - Authored business reports on AI mitigation strategies.
- Strategic Thinking and Problem-Solving - Demonstrated ability to solve real-world problems through Internship experience and Programming Projects, YouTube channels, etc.
- DevOps and Cloud Awareness - Familiar with AWS and Azure, also created multiple AI applications in Google Cloud Workspace.

- Teamwork and Collaboration - Worked effectively in Agile-style environments through group projects, internships, and as a Lab Demonstrator.
- Problem-Solving - Designed and deployed innovative solutions like AI-powered tools and custom business applications for real-world challenges.
- Eagerness to Learn - Continuously developed technical and professional skills through certifications, internships, and academic projects.
- Data Analysis & AI - Developed AI-powered tools and analysed consumer trends.
- SQL and Database Skills – Solid understanding of database systems.
- Cyber Security Awareness – Exposure to secure coding practices and systems management in technical projects and internships.
- Microsoft Power Platform - Created business tools using Power Apps, Power Automate and other Power Platform tools.
- Web Development - Proficient in HTML5, CSS, JavaScript, PHP, web API, etc.
- High academic achievement with a first-year average of 88%.
- Proficiency in programming languages, particularly Python & Java.
- Software Project Management – experienced in timely and quality delivery.
- Mathematics – advanced understanding of mathematical concepts applied in computing and data analysis.
- Android Studio, android app development.

Copilot

Professional Skills

1. **Eagerness to Learn**: Highlight your continuous development of technical and professional skills through certifications, internships, and academic projects.
2. **Communication**: Emphasize your clear communication skills, demonstrated through your technical research and business reports.
3. **Teamwork and Collaboration**: Mention your experience working in Agile-style environments, group projects, internships, and as a Lab Demonstrator.
4. **Responsibility and Initiative**: Showcase your willingness to take on responsibility through your problem-solving experiences and innovative solutions.

Technical Skills

1. **Cloud Awareness**: Highlight your familiarity with AWS and Azure, as well as your experience creating AI applications in Google Cloud Workspace.
2. **Scripting Languages**: Mention your proficiency in programming languages like Python and Java, and your awareness of scripting languages.
3. **DevOps**: Emphasize your knowledge of DevOps practices and tools, and your experience with cloud platforms.
4. **Data Analysis & AI**: Showcase your experience in developing AI-powered tools and analyzing consumer trends.
5. **SQL and Database Skills**: Highlight your solid understanding of database systems.
6. **Cyber Security Awareness**: Mention your exposure to secure coding practices and systems management in technical projects and internships.
7. **Microsoft Power Platform**: Highlight your experience creating business tools using Power Apps, Power Automate, and other Power Platform tools.

By emphasizing these skills, you'll demonstrate your alignment with the role's requirements and your ability to contribute effectively to the team. Best of luck with your application!

You

Based on this job description [same as above] which skills can I highlight?

Copilot

Given the job description and your CV skills, here are some key areas to highlight in your application:

Professional Skills

1. **Eagerness to Learn**: Emphasize your continuous learning through certifications, internships, and academic projects.
2. **Communication**: Highlight your clear communication skills, demonstrated through technical research and business reports.
3. **Teamwork and Collaboration**: Mention your experience working in Agile-style environments, group projects, internships, and as a Lab Demonstrator.
4. **Responsibility and Initiative**: Showcase your willingness to take on responsibility through your problem-solving experiences and innovative solutions.
5. **Attention to Detail**: Emphasize your ability to deliver accurate and high-quality work, backed by your strong academic achievements and project experiences.

Technical Skills

1. **Cloud Awareness**: Highlight your familiarity with AWS and Azure, as well as your experience creating AI applications in Google Cloud Workspace.
2. **Scripting and Programming**: Mention your proficiency in Python, Java, and awareness of scripting languages.
3. **Data Analysis & AI**: Showcase your experience in developing AI-powered tools, analyzing consumer trends, and working with data sets to produce reports and dashboards.
4. **SQL and Database Skills**: Emphasize your solid understanding of database systems.
5. **Cyber Security Awareness**: Highlight your exposure to secure coding practices and systems management.
6. **Microsoft Power Platform**: Mention your experience creating business tools using Power Apps, Power Automate, and other Power Platform tools.
7. **Web Development**: Briefly touch on your web development skills with HTML5, CSS, JavaScript, PHP, and web APIs.
8. **Data Presentation Techniques**: Highlight your ability to create dashboards, reports, and graphs to present data insights effectively.

By focusing on these skills, you'll demonstrate your alignment with the role's requirements and show how you can contribute effectively to the team. Good luck with your application!
